## 1. INTRODUCTION

- 1.1 The Asia-Pacific Economic Cooperation (APEC) Privacy Recognition for Processors (PRP) System was designed for organisations (data processors) who process data on behalf of client organisations (data controllers), to demonstrate their ability in providing effective implementation of a controller's privacy requirements.
- 1.2 APEC PRP will benefit businesses in the following ways:
- **Reduce Cost and Time** with a single and consistent set of privacy standards that facilitates international data flows.
  - **Build trust and confidence** by demonstrating a high-standard commitment to data protection among your business counterparts and customers.
  - **Provide assurance** to your organisation through third-party certification that improves and validates your data protection standards.
  - **Demonstrate good faith compliance** to enforcement authorities.
- 1.3 APEC PRP is a voluntary enforceable, accountability-based certification that seeks to help organisations demonstrate their capacity for processing of personal data in general, and to provide the assurance that the processing of personal data is at least consistent with similar requirements under the APEC Cross-Border Privacy Rules System. Certification is valid for 1 year and organisations would need to reapply for re-certification at least 3 months from the date of expiry of the certification.
- 1.4 The organisation must promptly notify IMDA of any Significant Change that arises during the certification period. A review may be conducted pursuant to the Significant Change and the organisation may be required to carry out any necessary corrective action or the certification may be terminated. More details on Significant Changes are set out in Section 10 below.

### APEC PRP Assessment Body
