**Subject:** Revision of the DVB-T2 IRD Technical Specification

Dear All,

This is Umer Rasheed from Panasonic, Singapore. We have a few queries with respect to the new DVB-T2 Specifications:

<https://www.imda.gov.sg/~media/imda/files/regulation%20licensing%20and%20consultations/ict%20standards/telecommunication%20standards/imda%20technical/imda%20ts%20dvb-t2%20ird%20issue%201%20revision%201.pdf?la=en>

As mentioned in the Addendum, SG6 is added in the specification (Please see page 36 of the file shared above).

Does this new specification also affect RF Testing.

Will IMDA update the test requirements as well?

If yes, when will be the new test case to be taken affect?

I would be highly grateful if you could respond to these queries. Thanks in advance.

Regards  
Umer Rasheed
