

Creating an inclusive and connected digital society

We are committed to strengthening Singapore's digital social compact by keeping people at the core of our efforts. We endeavour to create a safe and inclusive digital society, invest in digital infrastructure, and equip businesses and individuals with skills and tools to thrive in a digital future.

1

Building an inclusive digital society

A new DigitalAccess@Home scheme will be launched in Apr 2023 to ensure affordable digital access for all Singaporeans.

2

Building future-ready infrastructure

Developing a Digital Connectivity Blueprint to outline the way forward for Singapore's connectivity infrastructure. This will be supported by a Digital Infrastructure Advisory Panel comprising business and industry leaders.

3

Supporting business digitalisation

Progressively refreshing our Industry Digital Plans to guide companies on digital solutions and training.
