FACT SHEET

AI for Industry (AI4I)	
Targeted number of participants	2,000
Target participants	Engineers, software developers, managers and executives who are technically inclined and keen to learn or deepen their Python programming skills for using Data Science, Machine Learning and Artificial Intelligence to build applications.
Objective	The course will help participants better understand the use of AI and acquire basic programming skills, to prepare them for future job opportunities, career advancements and the digital revolution. Upon completion of the "Data Scientist in Python" course comprising of 20 carefully selected modules, participants will receive a "Foundations in AI" certification.
Programme Administrator	AI Singapore (AISG)
Programme Sponsor	Infocomm Media Development Authority (IMDA)
Content Partners	Microsoft, Intel and DataCamp
Pre-Requisite	Polytechnic diploma or University degree
Eligibility	Singaporean citizen or Permanent Resident
Course Delivery	Online/offline hybrid curriculum developed by DataCamp, weekly 1 hour long tutorials by AI SG mentors and at least 2 face-to-face workshops at AISG's office.
Course Duration	3 months The programme will commence from November 2018.
Course Fee	SGD$500. IMDA provides course fee support for individuals qualified for the programme under the TeSA Critical Infocomm Technology Resource Programme+ (CITREP+).

Category	Course Fee Support (CITREP)
NSF/Student	Up to 100%
SME-sponsored trainees/ 40 yrs and above Singaporeans	Up to 90%
Others	Up to 70%

Additional Notes	Course participants will continue to have access to the DataCamp platform for 9 additional months to allow them to learn new techniques and expand their skills continuously even after the formal 3-months programme is over.

AI for Everyone (AI4E)	
Targeted number of participants	10,000
Target participants	Secondary school students to working adults looking to gain an introduction to AI.
Objective	This course will help participants become more aware of AI and how AI can be used in their daily lives and companies. It will also help to dispel fears that AI will replace jobs, but instead can help them work more productively.
Programme Administrator	AI Singapore (AISG)
Programme Sponsor	Infocomm Media Development Authority (IMDA) and Microsoft
Content Partners	Intel and Microsoft
Eligibility	Minimum age of 13
Course Delivery	A workshop on "Introduction to AI" with access to curated materials from Intel and Microsoft and in conjunction with AI Singapore's community and partners such as IMDA, People's Association, NTUC U-Associates. Similar workshops are also planned in conjunction with and held on site in schools, polytechnics and Institutes of Technical Education.
Course Duration	3 hours The workshops will commence from end August 2018.
Course Fee	Free
Additional Notes	AI Singapore will publicise scheduled workshops on their channels and platforms. Participants are also given access to Kelaberetiv, AI Singapore's online collaboration platform. They will be connected to a wider AI community that comprises of companies, startups, researchers, students and professionals, and be able to take part in discussions on the forum that could lead to collaboration, research, business and employment opportunities.
