

Non-SIM Automatic Login Setup Guide For macOS 10.1 and newer

<p>Step 1: Remove any existing Wireless@SG profile from your device</p>	
<p>Step 2: Download the Wireless@SG app from Apple Mac Store.</p>	
<p>Step 3: Launch the Wireless@SG app. Select “Setup” from the menu.</p>	 <p>The screenshot shows the Wireless@SG application window. On the left is a sidebar menu with the following items: Home (with a house icon), Setup (with a gear icon), FAQs (with a document icon), Tutorial (with a question mark icon), Update Content (with a download icon), Contact Us (with a phone icon), and Terms of Use (with a document icon). The 'Setup' option is highlighted. The main content area on the right features a header 'Nearest Hotspot to You' with a refresh icon. Below this, a message states 'Your location services is disabled, please enable to allow location updates.' and a button labeled 'View All Hotspots' is visible.</p>

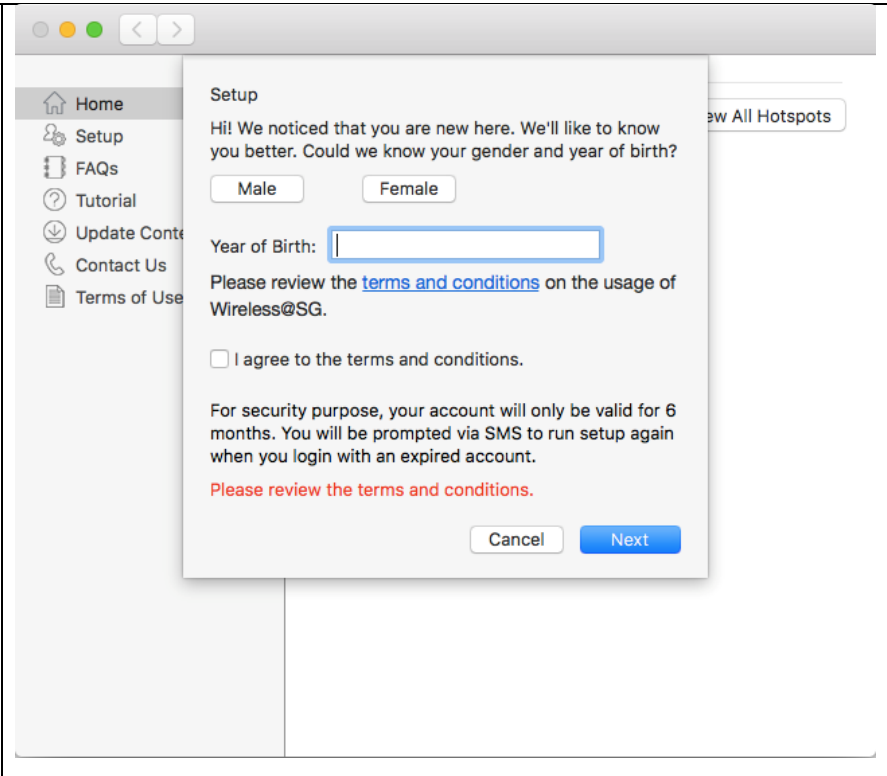

Step 4:

Select a Wireless@SG provider and key in your NRIC and mobile number and click “NEXT”.

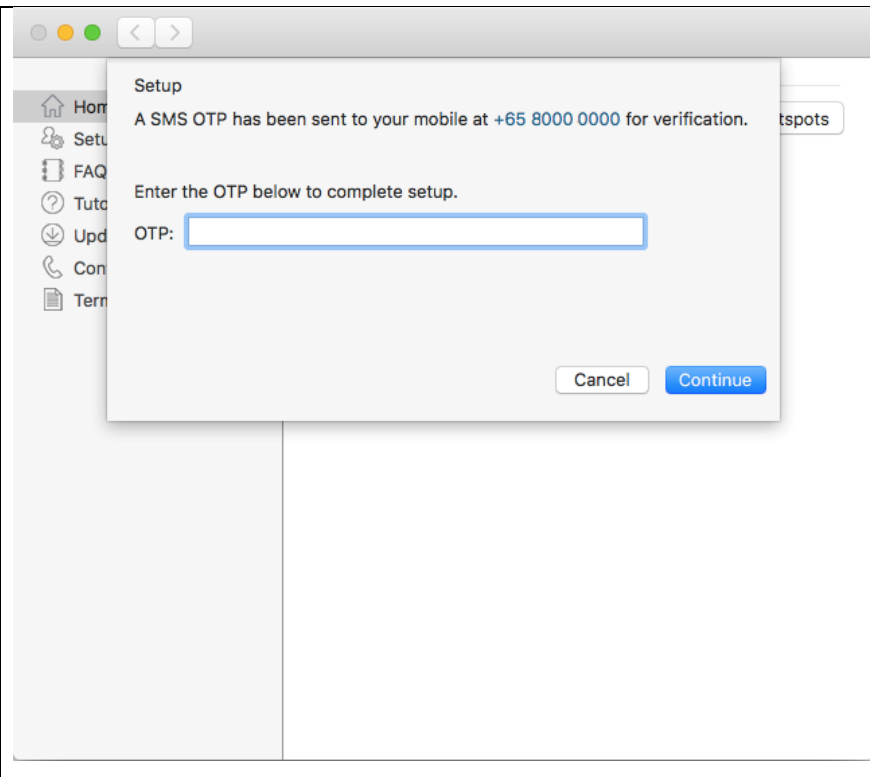

Step 5:

For first time users, you will be prompted to accept the terms & conditions, and to optionally provide your gender and year of birth.

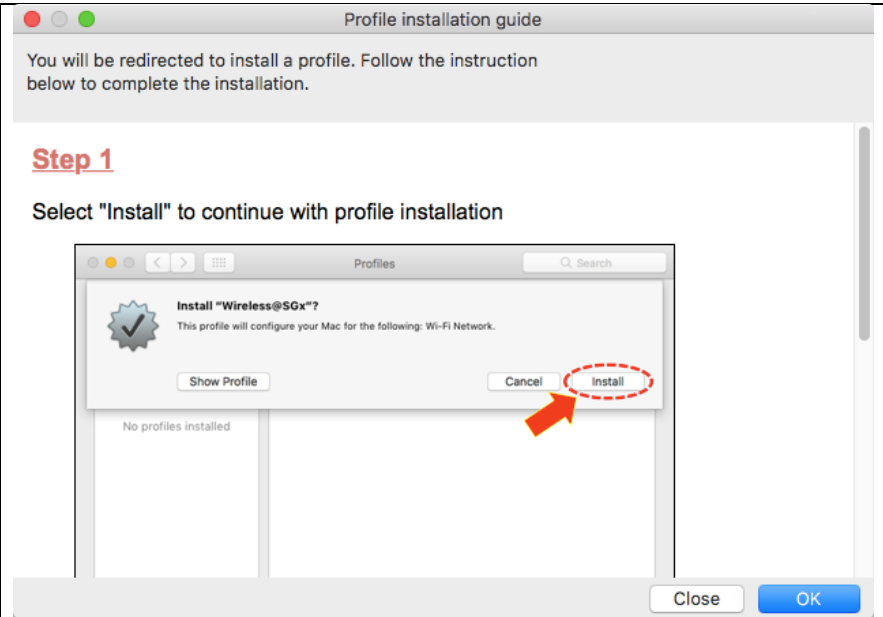

Step 6:

You will receive a one-time password (OTP) to the mobile number provided. Key in the OTP in the field and press “Next”.

Step 7:

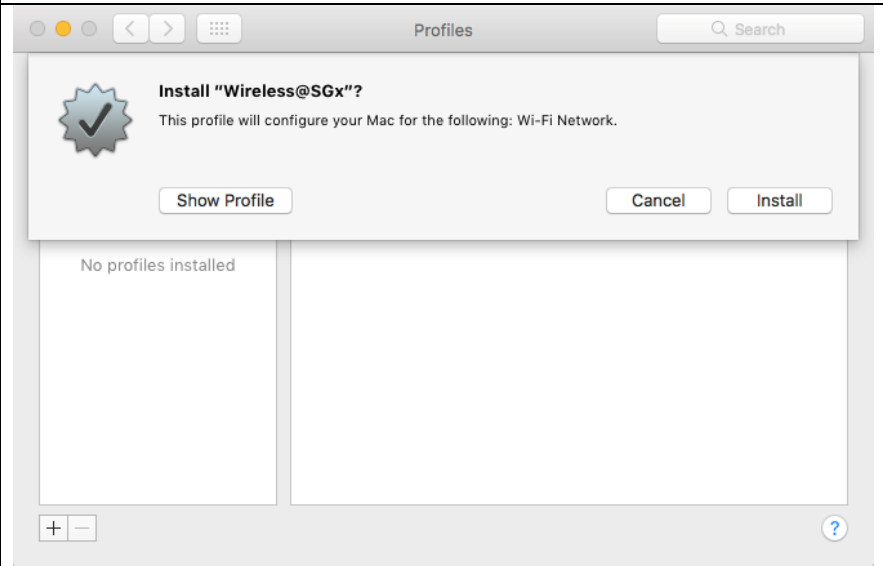

You will be redirected to install a profile. Follow the instructions on-screen to complete the installation.

The on-screen instructions are reproduced here for ease of reference

Step 8:

You will be prompted to install a profile. Select “Install” to continue.

The on-screen instructions are reproduced here for ease of reference

Step 9:

Enter your Mac username and password to complete the setup.

Congratulations. Your device is configured to connect automatically to Wireless@SGx
