

GTRIIP'S Digital Identity Platform

is the first software in the world that employs a selfie to validate a user, facilitating secure access into offices and fast check-ins in hotels

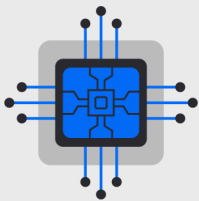

No Hardware System Needed

Leverages on users' own smartphone

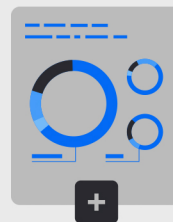

Minimum disruptions to current workflow

Automates current process

Increases productivity by 70%

Artificial Intelligence ensures less human error

Easy to scale organisations regionally and globally

With a web-based dashboard, it's easier to manage staff and guests' access into offices and hotels

With over 13,000 access points and 1 million check-ins worldwide, GTRIIP is at the forefront of authenticating a user through digital identity.
