# Holistic AI-Powered Modular Platform

Promotes Software Reliability across entire SDLC through comprehensive e2e Testing capabilities & SRE practices

SEAMLESS CAPABILITY
Across multiple platforms - Functional & API Testing, Service Virtualization, Chaos Engineering & Autonomous Ops (SLO)

ADVANCED AI SOLUTIONS
AI algorithms in air-gapped mode to auto-generate tests, auto-healing of test cases & predictive observability

COMPREHENSIVE TESTING
Seamless end-to-end testing across Web, Mobile, Mainframe & Desktop applications including data handoffs, with over 400 no-code actions

PROACTIVE SRE PRACTICES
Chaos Engineering & SLO Management perform failure injections across on-premise & Hybrid Cloud, measure reliability across disparate Observability data sources

READY DEPLOYMENT
Across on-premise, enterprise-managed Cloud and SaaS, with attractive licensing

STRONG DATA GOVERNANCE
Trusted by regulators, banks, insurers & payment systems across SaaS & all enterprises with offices in Singapore, India & the USA.
