Cloud Service Provider Disclosure (SS 584:2020 MTCS)

The form is to be completed for each cloud service provided. For questions not applicable or not disclosed, indicate accordingly in the remarks. Date of disclosure: Applicable cloud service(s): ______ **Cloud Service Provider Contact Information** Company name: Primary address: Web address: Contact name: Contact number: _____ Contact email: ____ MTCS certificate number: ___ Company stamp: _____ Company representative signature: _____ **Certification Body Contact Information** Company name: _____ Web address: Contact name: Contact number: _____ Contact email: _____ Company stamp: _____ Lead auditor signature: _____ Cloud Service Provider Background Overview of service offering: Service model: ☐ Virtual machine instances owned by the cloud service customer

Network facilities

Depl	Compliance with applicable standards Deployment model:		
	☐ Private cl	oud	
	☐ Communi	ity cloud	
	☐ Hybrid clo	oud	
	☐ Public clo		
Tier:			
	Level 1		
	Level 2		
	Level 3		
No.	Criteria	Description	Remarks
Lega	al and Complianc	e	
1.	Right to audit	The cloud service customer has the right to audit:	
		☐ Virtual machine instances owned by the cloud service customer	
		☐ Network facilities	
		☐ Compliance with applicable standards	
		☐ Technical controls	
		☐ Policies and governance	
		☐ Data centre facilities	
		☐ Others	
		□ None	
		Regulators recognised by Singapore law have the right to audit:	
		☐ Virtual machine instances owned by the cloud service customer	
		☐ Network facilities	
		☐ Compliance with applicable standards	
		☐ Technical controls	
		☐ Policies and governance	
		☐ Data centre facilities	
		Others	

		☐ None	
		Audit / assessment reports that can be made available on request:	
		☐ Penetration test	
		☐ Threat and vulnerability risk assessment	
		☐ Vulnerability scan	
		☐ Audit reports (e.g. Statement on Standards for Attestation Engagements (SSAE) No. 16, Reporting on Controls at a Service Organisation)	
2.	Compliance	The following guidelines / standards / regulations are adhered to:	
		☐ Singapore Personal Data Protection Act	
		☐ ISO/IEC 27001	
		☐ ISO 9000	
		☐ ISO/IEC 20000	
		☐ CSA Open Certification Framework	
		☐ PCI-DSS	
		Others	
Data	Control		
3.	Data ownership	All data on the cloud service is owned by the cloud service customer except for:	
		The cloud service customer retains the ownership on the derived data or attributes of cloud usage except for the following:	
		Advertising or marketing	
		☐ Statistics analysis on usage	
		Others	
4.	Data retention	Data deleted by the cloud service customer is retained as follows:	
		☐ Minimum data retention period is:	
		☐ Maximum data retention period is:	
		☐ Deleted immediately	
		Log data is retained for a period of:	
		Minimum data retention period as follows:	

		☐ Maximum data retention period is: ☐ Not retained Cloud service customer data is retained for a period of: ☐ Minimum data retention period is: ☐ Maximum data retention period is: ☐ Not retained The following types of data are available for download by the cloud service customer: ☐ Log data ☐ Others	
5.	Data sovereignty	The primary data locations are: Singapore Asia Pacific Europe United States Others The backup data locations are: Singapore Asia Pacific Europe United States Others No. of countries in which data centres are operated: The cloud service customer's data stored in the cloud environment will never leave the locations specified in item 5: Yes Yes, except as required by law Yes, except as noted:	

		□ No	
		Cloud service customer's consent is required prior to transferring data to a location not specified in item 5 or a third party:	
		Yes	
		Yes, except as required by law	
		Yes, except as noted:	
		☐ No	
		Note: Cloud service customers are responsible for determining the impact of data protection and data sovereignty laws on the locations where data is stored. In addition, cloud service customers should understand the risks associated with relevant laws that may allow for law enforcement or other government access to data in-transit or storage with Cloud Service Providers.	
6.	Non- disclosure	☐ Non-disclosure agreement template can be provided by Cloud Service Provider	
		☐ Cloud Service Provider may use customer's NDA (pending legal review)	
Prov	ider Performance	9	
7.	Availability	The committed network uptime is:	
		%	
		☐ Varies according to price plan	
		The committed system uptime is:	
		%	
		☐ Varies according to price plan	
		The cloud environment has the following single points of failure: none	
8.	3 rd party dependency	Highlight areas of critical dependency for service delivery:	
9.	BCP / DR	☐ Disaster recovery protection	

		☐ Backup and restore service	
		☐ Cloud service customer selectable backup plans	
		☐ Escrow arrangements	
		☐ No BCP / DR is available	
		☐ RPO	
		☐ RTO	
		Others, please specify:	
10.	Liability	The following terms are available for the cloud service customers or failure of the provider to meet the service commitment:	n
		☐ Network failure	
		Liability:	
		☐ Infrastructure failure	
		Liability:	
		☐ Virtual machine instance failure	
		Liability:	
		☐ Migrations	
		Liability:	
		☐ Unscheduled downtime	
		Liability:	
		☐ Database failure	
		Liability:	
		☐ Monitoring failure	
		Liability:	
11.	Shared responsibility	Communication of shared roles & responsibilities for which CSC needs to implement and manage for use of this cloud service	
		URL (or attach file):	
Serv	ice Support		
12.	Change management	The Cloud Service Provider has established the following fo changes, migrations, downtime, and other potential interruptions to cloud services:	

	l		
		☐ Communication plan and procedures for proactive notification	
		Assistance in migration to new services when legacy solutions are discontinued	
		☐ Ability to remain on old versions for a defined time period	
		☐ Ability to choose timing of impact	
13.	Self-service provisioning and management portal	Provide self-service provisioning and management portal for cloud service customers to manage cloud services: Yes No If yes, describe the functions of the self-service provisioning and management portal provided: Allow role-based access control (RBAC) Manage resource pools (e.g. VMs, storage, and network) and service templates Track and manage the lifecycle of each service Track consumption of services Health monitoring Others:	
14.	Incident and problem management	Delivery mode of support: Access via email Access via portal Access via phone support Direct access to support engineers Availability of support: 24 x 7 During office hours support, please specify the hours of operations: After office hours support, please specify the hours of operations: Service response time:	

		Notification time of cloud service outage incident:
		Communication channel used for notification of cloud service outage incident:
		The following are available to cloud service customers upon request:
		Permanent access to audit records of customer instances
		☐ Incident management assistance
		Incident response time:
		Mean time to repair on detection of faults:
15.	Billing	The following billing modes are available (please elaborate granularity of charges and measurement):
		Pay per usage (up to per min/hour/day/month for compute/storage for laaS/PaaS, and per cloud service customer per hour/day/month/year for SaaS)
		☐ Fixed pricing (up to yearly/monthly/daily)
		Other pricing model
		☐ Not disclosed
		Available billing history: months
16.	Data	Importable VM formats:
	portability	Downloadable formats: JSON/XML/other open formats (to specify)
		Supported operating systems:
		Language versions of supported operating systems:
		Supported database formats:
		Policy/guide available:
		API:
		☐ Common
		Customised
		Upon service termination or prolonged outage, data is available through:

		☐ Physical media	
		☐ Standard methods as described above	
		Other methods	
17.	Interoperability	Use of industry standards and availability of APIs to support interoperability:	
		Transport supported (e.g. REST based HTTPS/MQTT)	
		Format supported (e.g. JSON/XML)	
		APIs supported	
		Other methods	
		Guide available	
18.	Access	Type of access to the service is through:	
		☐ Public access	
		Private access (e.g. VPN, dedicated link)	
		☐ IPv6 access is supported	
		Other access methods	
		Public access speed (shared bandwidth) in Mbps:	
19.	User	☐ Identity management	
	management	Role based access control	
		☐ Federated access model	
		☐ Integration with Identity management solutions	
		Others	
20.	Lifecycle	The cloud service customer may select the following for service upgrades and changes:	
		☐ Automatic provisioning	
		☐ Cloud service customer customisable provisioning	

Secu	ecurity Configurations		
21.	Security configuration enforcement checks	Security configuration enforcement checks are performed: Manually Using automated tools How often are enforcement checks being performed to ensure all security configurations are applied?	
22.	Multi-tenancy	 □ Distinct physical hosts □ Distinct physical network infrastructure □ Virtual instance grouping □ Cloud service customer definable security domains □ Cloud service customer customisable firewall □ Cloud service customer definable access policies 	
23.	Hybrid cloud provision	Ability to monitor, track, apply and enforce CSC's security & privacy policies on its cloud workloads: Data protection and encryption key mgmt. enforcement geolocation-based/resource pools and secure migration of cloud workloads Key mgmt. and keystore controlled by CSC Persistent data flow segmentation before and after geolocation-based/resource pools secure migration Compliance enforcement for regulated workloads between on-premises private and hybrid/public cloud Others	
Serv	ice Elasticity		
24.	Capacity elasticity	The following capacity elasticity options are available: Programmatic interface to scale up or down Mean time to start and end new virtual instances Alerts to be sent for unusual high usage Minimum performance during peak periods Minimum duration to scale up computing resources Minimum additional capacity guaranteed per account	

		(number of cores and GB memory)
25.	Network resiliency and elasticity	The following network resiliency and elasticity options are available: Redundant Internet connectivity links Redundant Internal connectivity Selectable bandwidth up to Mbps Maximum usable IPs Load balancing ports Load balancing protocols
		☐ Anti-DDOS protection systems or services ☐ Defence-in-depth mechanisms, please specify:
		 Network traffic isolation, please specify: Shared or dedicated bandwidth, please specify:
		☐ QoS traffic control services ☐ Alerts to be sent for unusual high usage ☐ Minimum performance during peak periods ☐ Minimum period to scale up network throughput
26.	Storage redundancy and elasticity	The following storage redundancy and elasticity options are available: Redundant storage connectivity links within each data centre Redundant storage connectivity links between data centres belonging to the same cloud Storage traffic isolation, please specify: Shared or dedicated storage network bandwidth, please specify: Quality of service storage traffic control services Maximum storage capacity for entire cloud, please specify:

☐ Maximum storage capacity for single cloud service customer, please specify:
☐ Maximum expandable storage, please specify:
☐ Alerts to be sent for unusual high usage ☐ Minimum storage I / O performance during peak periods
☐ Minimum period to scale up storage I / O throughput
