

DATA IN THE CITY HACKATHON

Organised by the Infocomm Development Authority of Singapore (IDA), 'Data in the City', is a 2-day Hackathon being held from Aug 23 - 25, 2013, in partnership with UP Singapore.

The weekend brought together more than 160 urban planners, architects, sustainability experts, technologists, researchers, developers and designers to co-create new prototypes to help Singapore become a more livable, competitive and sustainable city.

Hackathon Winners

18 Prototypes were developed over the weekend. The top 5 Winners were fast-forwarded into the finals of the Apps4SG Competition.

Each team won \$500 as well as additional prizes.
