

**About Coursera**

Coursera's mission is to educate millions of people worldwide by offering free online access to classes from top universities and institutions. Coursera's comprehensive education platform combines mastery-based learning principles with video lectures, interactive content, and a global community of peers, offering students a unique online learning experience. Coursera is financially backed by Kleiner Perkins Caufield & Byers, New Enterprise Associates, GSV Capital, International Finance Corporation, Laureate Education Inc., Learn Capital, and Yuri Milner, as well as a number of universities, including California Institute of Technology and the University of Pennsylvania.

For more information, visit [Coursera.org](https://www.coursera.org).

**Koh Pang Wei**

Koh Pang Wei leads the development of university-facing products at Coursera. Before that, he served as Director of Partnerships and Course Operations, building a team that scaled the company up from 1 to 100+ partner institutions in two years.

Before joining Coursera, Pang Wei worked on computational biology and machine learning in the Stanford Artificial Intelligence Lab with Professors Andrew Ng and Daphne Koller, Coursera's co-founders. He has published in a range of fields, from machine learning and quantum computing to computational healthcare and online education. His research on computational cancer morphology was recently recognized by several awards, including the Ernest Walton Medal for Computer Science, awarded by the President of Ireland.
