ANNEX A

FACT SHEET
Infocomm Enterprise Programme (iEP)

Aim

The Infocomm Enterprise Programme (iEP) is a sector-wide partnership programme that aims to assist local infocomm enterprises (iLEs) in developing their capabilities and IP to implement and deliver large scale, sector-wide projects, thus increasing their export potential.

Benefits

Though participation in this programme, iLEs can:
- enhance their capabilities to undertake large-scale, sector-wide infocomm projects and in creating new IP;
- gain increased recognition in both the local and overseas markets, which will strengthen their internationalisation efforts.

Eligibility

Interested applicant should be a Singapore-registered infocomm enterprise or an iLE-led consortium with sound financial records.

The project can be implemented in any sector in Singapore with an emphasis of a sector-wide transformation for the innovative use of technology and pioneering system implementation.

The end customer(s) should be willing to co-share the implementation cost with the iLE and the project must be deployed within 18 months of award.

How to Apply?

For more information, clarification or to apply for the programme, please contact:
