About ANTLabs

ANTlabs is the market leading vendor for enabling WiFi/WiMAX hotspots in Asia with our network service gateways. Our SSG3* service gateways powers city-wide connectivity from Wireless@SG in Singapore to WiMAX in Taiwan, to connecting communities in Oman and Yemen in the Middle-East.

ANTlabs' InnGate* hospitality gateways are key business enablers for hotels, airports and convention centres deploying High Speed Internet Access (HSIA) services for their guests. ANTLabs' Securite* internet transaction security solution protects online users from identity theft, and protecting them from spyware, keyloggers, phishing when visiting FSI, e-Government, e-Gaming, and social networking sites.

About Ecquaria

Ecquaria revolutionises the way governments engage with citizens and businesses. For over a decade, the company's award-winning flagship product, the Ecquaria Service-Oriented Platform™ (Ecquaria SOP™), people and its leading-edge Integrated Government (iGov) philosophy and solutions have set new benchmarks in innovative public service delivery.

The first to introduce and adopt a radical new Service-Oriented approach as an immutable forethought in the design, development and deployment of iGov infrastructures, Ecquaria has earned global accolades for excellence in e-government consulting, its domain expertise and in delivering high-volume, complex mission-critical applications for its customers worldwide.

Backed by a solid staff strength and a global network of partners, Ecquaria's track record is built on its innovative corporate culture and dedicated professionals. Recognised as one of the top 25 rising stars in Asia (MIS Asia, 2004) and a key architect in designing and deploying Singapore government's flagship e-Government Action Plans I (Public Service Infrastructure) and II (Online Business Licensing Service) initiatives, Ecquaria is committed to provide our customers world-class public service innovation that delights citizens and businesses.

About ST Electronics (Info-Security)

ST Electronics (Info-Security) is a leading info-security company offering digital watermarking solutions, hardware-based disk encryption solutions, USB authentication tokens for access control, and hardware encryption devices for securing phone, fax and IP networks serving areas of communication, end-point and content security. We adopt a technology-centric and innovation-centric culture in developing the DigiSAFE brand of products and promise to meet the infocomm security needs of the day.

DigiSAFE DCM300 is an external portable HDD enclosure supporting both USB and FireWire interfaces. DCM300 provides real-time hardware encryption with smartcard-based 2-factor authentication. This device supports AES 128-bit or 256-bit encryption to encrypt all the data in the drive and the data is inaccessible even if someone removes the drive from the enclosure. Designed to meet FIPS 140-2 level 2 standards, it is suited ideally for government agencies and organizations that require strong secure storage for portable data.
