

Quotes from Consortia Lead Agency

Innosys Pte Ltd

“The e-freight@Singapore project is a very good example of how shippers, freight-forwarders, and other service providers can increase output per man-hour by automated re-use of data and hence increase productivity in the entire supply chain.”

- *Mr Lam Peng Foo, Managing Director*

Kewill Pte Ltd

“Kewill and its industry partners are very pleased to have been selected as one of the consortiums consortia to be part of the e-freight@Singapore initiative. The concept of e-freight is designed to make life as simple as possible for the air cargo and logistics sector. By reducing, reusing and recycling data, e-freight will reduce the administrative burden on shippers and logistics service providers in manual data entry. Kewill’s e-freight solution, Kewill Xchange will provide additional benefits to its users locally and globally, who can leverage on Kewill’s global reach to position themselves at the forefront of global trade process management.”

- *Mr Evan Puzey, Chief Operating Officer - Asia Pacific*

Visiflex Pte Ltd

“Built on the e-freight@Singapore key concepts of data at source and data re-use, the Visiflex Cargo Cloud (VCC) system is able to reduce manual data re-entry for various stakeholders along the supply chain. VCC is also designed to cater to the different needs of various stakeholders, especially SMEs who will be able to connect to the platform with minimal investments.”

- *Mr Desmond Tay, Director*
