

Dear sirs

I disagree with the proposal of an opt-out system. If a person wants to receive spam, he should opt-in.

No one should be forced to accept what he does not want notwithstanding any drive towards ecommerce. It is flawed logic. No one should be forced to accept garbage. A company or the government depts may encourage ecommerce. If it is sufficiently attractive and forced by international trends, consumers will naturally choose the ecommerce option - there is no need to force it on them. There is no need to go overboard on promoting it.

Best Regards,

Lim Koon Hock
