<u>ANNEX 8A: REQUEST FORM FOR BUILDING MDF ROOM TO RESIDENTIAL PREMISE CONNECTION</u>	

SCHEDULE 8

BUILDING MDF ROOM TO RESIDENTIAL PREMISE CONNECTION

1. SCOPE

This Schedule 8 sets out the terms and conditions under which OpenNet will provide the Requesting Licensee with a licence for Layer 1 Service (a service provided by OpenNet for the use of passive optical fibre cable) from OpenNet's designated Building MDF Room to the First Termination Point of a Residential Premise (**Building MDF Room to Residential Premise Connection**).

- 1.1 The Building MDF Room to Residential Premise Connection is provided to a Residential Premise at a:

[CLAUSE 1.1\(a\) – DIRECTED AMENDMENTS](#)

- (a) High-Rise Residential Building/[Non-Residential Building](#); or

[For clarity and consistency, clause 1.1\(a\) should clearly state that besides “High-Rise Residential Building”, OpenNet shall also provide the Building MDF Room to Residential Premise Connection to a Residential Premise at a “Non-Residential Building”.](#)

[CLAUSE 1.1\(b\) – DIRECTED AMENDMENTS](#)

- (b) Landed Residential Premises.

[For consistency, IDA directs OpenNet to amend clause 1.1\(b\) in the manner specified above.](#)

- 1.2 This Schedule only applies to Requesting Licensees who are FBOs.

2. SERVICE LEVEL GUARANTEES

[CLAUSE 2.1 – DIRECTED AMENDMENTS](#)

- 2.1 OpenNet will provide the Service Level Guarantees in respect of the Building MDF Room to Residential Premise Connection as set out in this Schedule. If OpenNet fails to meet any service activation period, Mean Time To Recovery or service level availability (collectively called the **Service Level Guarantees**)

applicable to this Schedule and the failure to meet the Service Level Guarantees is solely ~~and directly~~ caused by OpenNet, ~~or~~ its contractors and/or suppliers, OpenNet will provide a remedy in the form of a rebate to the Requesting Licensee in accordance with:

IDA considers that OpenNet's proposed modifications are not fully compliant with IDA's 3 July 2009 Directed Modifications, because it seeks to limit OpenNet's liability where it is an indirect cause of the failure to meet Service Level Guarantees. Further, the requirement of "directly" represents an unnecessary impediment to Requesting Licensees making appropriate claims for rebates.

Accordingly, IDA directs OpenNet to amend this clause 2.1 in the manner specified above.

- (i) Clause 6.10 and any terms and conditions contained in this Schedule in respect of request and provisioning timeframes;
- (ii) Clause 11.13 and any terms and conditions contained in this Schedule in respect of fault rectification timeframes; and
- (iii) Clause 12.1 and any terms and conditions contained in this Schedule in respect of service level availability.

CLAUSE 2.2 – APPROVED

2.2 A claim by the Requesting Licensee shall be made in writing within thirty (30) Calendar Days of the completion of the relevant calendar month on which the Service Level Guarantees are measured. The amount in respect of any claim shall be paid to the Requesting Licensee in the form of a rebate. The Requesting Licensee acknowledges that a failure to make a claim within the specified timeframes under this paragraph means that the Requesting Licensee waives any entitlement to the Service Level Guarantee payment in respect of that claim.

2.3 If the Requesting Licensee is entitled to a rebate pursuant to the claim made hereunder, the amount of the rebate will be credited into the Requesting Licensee's account after it has been processed by OpenNet and will be reflected in OpenNet's bill to the Requesting Licensee in accordance with OpenNet's billing cycle.

2.4 The guarantee and rebates provided by OpenNet are:

- (i) of an ex-gratia nature and personal to the Requesting Licensee and are non-transferable; and
- (ii) subject to this Schedule.

2.5 Despite anything to the contrary in this section, if the Requesting Licensee qualifies for any claim, OpenNet shall honour its obligations in respect of that claim but in the event of a dispute as to whether the Requesting Licensee qualifies for a claim or as to the quantum of the claim payable to the Requesting Licensee, the dispute shall be resolved in accordance with the Dispute Resolution Procedures in Schedule 17 of the ICO Agreement, or in the case of a Billing Dispute, in accordance with Schedule 16 of the ICO Agreement.

2.6 In addition to the specific terms and conditions of the Service Level Guarantees, the Service Level Guarantees shall not apply in any of the following circumstances:

CLAUSES 2.6(a) AND 2.6(c) - APPROVED

- (a) the Building MDF Room to Residential Premise Connection is disconnected and/or reconnected by reason of it being suspended under the terms and conditions of this Schedule or ICO Agreement, except where the suspension is due to OpenNet's fault;
- (b) fault due to any equipment, wiring and/or cabling owned or operated by the Requesting Licensee or on behalf of the Requesting Licensee;
- (c) provision or restoration of the Building MDF Room to Residential Premise Connection where any site-coordination meeting, Joint Investigation Meeting or fault identification coordination meeting is involved, except where (a) the fault was caused by OpenNet; and (b) the Requesting Licensee has not contributed to any delay in setting up the meeting. Notwithstanding the above, in determining whether the Service Level Guarantees have been met by OpenNet, the time taken from the start of arranging any site-coordination meeting, Joint Investigation Meeting or fault identification coordination meeting up to the end of the meeting, shall always be excluded;

CLAUSE 2.6(d) – DIRECTED AMENDMENTS

- (d) where OpenNet needs to obtain or maintain any licence or permission necessary to the provision or restoration of the Building MDF Room to Residential Premise Connection. Notwithstanding the above, in determining whether the Service Level Guarantees have been met by OpenNet, the time taken by OpenNet to obtain or maintain any licence or permission necessary to the provision or restoration of the Building MDF Room to Residential Premise Connection shall always be excluded;

Where OpenNet needs to obtain or maintain any licence or permission which is necessary to the provision or restoration of the Building MDF Room to Residential Premise Connection, IDA considers it fair and reasonable that the Service Level Guarantees shall apply except that the time taken for obtaining or maintaining the licence or permission shall be excluded in the determination of the Service Level Guarantees, since OpenNet would be able to resume the provisioning or restoration of the service upon obtaining or maintaining the licence or permission.

Accordingly, IDA directs OpenNet to amend this clause 2.6(d) in the manner specified above

- (e) delay in the provision or restoration of the Building MDF Room to Residential Premise Connection caused by events beyond OpenNet's reasonable control;
- (f) OpenNet network outages for which the Requesting Licensee has not reported a fault;

CLAUSE 2.6(g) – APPROVED

- (g) fault is reported by the Requesting Licensee but no fault is found or confirmed after due and careful investigation, and verification by OpenNet;
- (h) OpenNet is required to carry out scheduled service interruption and the Requesting Licensee has been informed in accordance with clause 9.5; or

CLAUSE 2.6(j) - APPROVED

- (i) OpenNet is required to carry out fibre diversion at the request of the Government Agencies, private developers or other relevant parties and the Requesting Licensee has been informed in accordance with clause 9.5.

- 2.7 If the Requesting Licensee disputes OpenNet's reason for rejection, its records and/or the amount of rebate, the Requesting Licensee shall not be entitled to be credited with any rebate until and unless the dispute has been resolved.
- 2.8 A failure by OpenNet to meet any Service Level Guarantee does not constitute a breach of the ICO Agreement or this Schedule.
- 2.9 The Requesting Licensee acknowledges that the relevant remedy provided under clause 2.1 is a genuine pre-estimate of the Requesting Licensee's loss and will be the sole and exclusive remedy available to the Requesting Licensee for such failure to meet the relevant Service Level Guarantees for the Building MDF Room to Residential Premise Connection and shall be OpenNet's sole and exclusive liability to the Requesting Licensee for such failure.

3. SERVICE DESCRIPTION AND ACCESS POINTS

- 3.1 OpenNet will provide a licence for the Building MDF Room to Residential Premise Connection to the Requesting Licensee with the following:
- (a) one (1) fibre strand from OpenNet's Fibre Distribution Frame (**FDF**) at the Building MDF Room designated by OpenNet to the First Termination Point of the Residential Premise if requested by the Requesting Licensee; and
 - (b) one (1) Patching Service at OpenNet's FDF at the Building MDF Room.
- 3.2 The Requesting Licensee shall access the Building MDF Room to Residential Premise Connection at OpenNet's FDF at the Building MDF Room designated by OpenNet and at the First Termination Point of the Residential Premise.

4. ORDERING AND PROVISIONING PROCEDURE

CLAUSE 4.1(a) – APPROVED

- 4.1 The Requesting Licensee shall submit its request for the Building MDF Room to Residential Premise Connection (**Request**) to OpenNet on a Business Day in the form of Annex 8A stating, but not limited to the following information:
- (a) the End-User's name, telephone number and address of the Residential Premise.

- 4.2 Relocation of the Building MDF Room to Residential Premise Connection is not allowed.
- 4.3 OpenNet shall at its sole discretion determine the serving Building MDF Room from which the Building MDF Room to Residential Premise Connection will be provided.

CLAUSE 4.4 – DIRECTED AMENDMENTS

- 4.4 Initially, information relating to the Mandated Services will be available on OpenNet’s website, for access by the Requesting Licensee through secured means. The secured access to OpenNet’s website will require the payment of a Per User Account eCharge (specified in clause 14 of Schedule 15 (Charges)) for each user account created. Initially, information relating to network outages will be sent to the Requesting Licensee via email. The information relating to the Mandated Services and the information relating to network outages shall be made available on the OpenNet Platform in due course. For the avoidance of doubt, such Per User Account Charge shall not be re-imposed when the information relating to Mandated Services is made available on the OpenNet Platform.

For the avoidance of doubt, IDA considers that there is merit to make clear that the applicable charge is the user account charge and that it would be unreasonable to impose the user account charge a second time upon the OpenNet Platform becoming available.

Accordingly, IDA directs OpenNet to amend this clause 4.4 in the manner as specified above.

5. BUILDING MDF ROOM TO RESIDENTIAL PREMISE CONNECTION REQUEST

CLAUSE 5.1 - APPROVED

- 5.1 OpenNet shall process all Requests for the Building MDF Room to Residential Premise Connection on a ‘first come, first served’ basis.

CLAUSE 5.2 - DIRECTED AMENDMENTS

- 5.2 For each Business Dayweek, OpenNet shall process a combined total of no more than 410–2050 Requests for Basic Mandated Services and Layer 1 Redundancy Services (**Maximum Quota**) from all Requesting Licensees, and a daily-weekly roll-over mechanism shall apply for additional Requests beyond

the Maximum Quota. For avoidance of doubt, OpenNet will process additional Requests beyond the Maximum Quota in the next available week on a ‘first come, first served’ basis.

IDA is of the view that a weekly roll-over mechanism where OpenNet will process 2050 Requests per week is less restrictive than OpenNet’s proposed daily roll-over mechanism where OpenNet will process only 410 Requests per Business Day because OpenNet will process more than 410 Requests on a certain Business Day (subject to a total of 2050 Requests in a week) if there is high demand on that particular Business Day. In addition, IDA is of the view that OpenNet should provide more clarity on the weekly roll-over mechanism.

Accordingly, IDA directs OpenNet to amend this clause 5.2 in the manner as specified above.

CLAUSES 5.3 AND 5.4 – DIRECTED AMENDMENTS

5.3 Within ~~three~~one (13) Business Days of the date on which OpenNet receives the request for Building MDF Room to Residential Premise End-User Connection (**Request Date**) and subject to clause 5.2, OpenNet must notify the Requesting Licensee (and shall provide the Requesting Licensee with a unique reference number or a similar form of identification in the notification) ~~whether~~ its Request is ~~accepted, or if rejected,~~ for any one of the following reasons:

- (a) the Request for Building MDF Room to Residential Premise Connection is not in the prescribed form;
- (b) the Request does not contain all the required information or the information provided is inaccurate or misleading;
- (c) the service activation date requested is less than three (3) Business Days from the date of receipt of a Request; or
- (d) the Requesting Licensee has committed a material breach of the ICO Agreement or this Schedule.

5.4 Within three (3) Business Days of the Request Date and subject to clause 5.2, OpenNet must notify the Requesting Licensee (and shall provide the Requesting Licensee with a unique reference number or a similar form of identification in the notification) whether its Request is accepted, or if rejected, for any one of the following reasons, except where there is insufficient capacity, OpenNet must also

notify the Requesting Licensee within three (3) Business Days of the Request Date that there is insufficient capacity and the timeframe to notify the acceptance or rejection of the Request shall be extended to within ten (10) Business Days of the Request Date:

(e)(a) the equipment or services that the Requesting Licensee proposes to use or to provide interfere with, or cause deterioration to services supplied by OpenNet;

(f)(b) there is obstruction from building owner, building management, home owner or End-User to OpenNet installation or installation schedule;

CLAUSE 5.4(c) – DIRECTED AMENDMENTS

(g)(c) OpenNet has not rolled out its Network to the ~~Residential~~ Building; or

IDA refers to IDA annotations to clause 1.1(a) and accordingly directs OpenNet to amend this clause 5.4(c) in the manner specified above.

FORMER CLAUSE 5.3(h) - DIRECTED AMENDMENTS

~~(h)(d) OpenNet needs to increase capacity to provide the Building MDF Room to Residential Premise Connection; or~~

Under clause 6.2, OpenNet is required to increase capacity in accordance with the service activation period stated therein if there is insufficient capacity. Hence, OpenNet's need to increase capacity should not be a reason for rejection of a Request.

Accordingly, IDA requires OpenNet to delete former clause 5.3(h) in its entirety.

(i)(d) there are security and confidentiality requirements or restrictions imposed on OpenNet by Government Agencies.

IDA considers it reasonable to expect OpenNet to be able to assess whether the Requesting Licensee's application is to be rejected for the reasons described in clauses 5.3(a), 5.3(b), 5.3(c) and 5.3(d) within one (1) Business Day instead of three (3) Business Days as proposed by OpenNet since the assessment contemplated therein is relatively straightforward.

Accordingly, IDA directs OpenNet to amend clauses 5.3 and 5.4 in the manner specified above.

FORMER CLAUSE 5.4 – DIRECTED AMENDMENTS

~~5.4 Notwithstanding anything in clause 5.3 to the contrary, OpenNet shall give a qualified acceptance to the Requesting Licensee with a revised service activation period if:~~

~~(a) there is initial obstruction from the building owner, building management, home owner or End User to OpenNet installation or installation schedule, but within two (2) Business Days from the initial visit, the Requesting Licensee obtains a firm commitment from the building owner, building management, home owner or End User (as applicable) and submits a written confirmation to OpenNet (in the form of Annex 8B) that OpenNet would be allowed access on a definite date acceptable to OpenNet and that the Requesting Licensee shall pay the Installation and Onsite Charges for that visit and all subsequent visits by OpenNet~~

~~(b) OpenNet needs to increase capacity in order to provide the Building MDF Room to Residential Premise Connection, but OpenNet has, at the time of the Request, already scheduled for capacity to be increased by a definite date.~~

Upon review of OpenNet's proposed modifications relating to the qualified acceptance of a Request, IDA is of the view that a qualified acceptance process may be cumbersome for OpenNet to administer and burdensome to the Requesting Licensee to comply with. It will be more straightforward for OpenNet to reject the Request and the Requesting Licensee to submit a new application when the underlying conditions in clause 5.4 (b), which is not a result of OpenNet's fault, is addressed by the Requesting Licensee. Also, to avoid the situation where OpenNet accepts a Request but subsequently finds out that one or more of the reasons for rejection has occurred when OpenNet carries out the installation of the service, OpenNet should have until the last day of the relevant service activation period, i.e. on the third Business Day, where there is sufficient capacity to provide the Building MDF Room to Residential Premise Connection; and on the tenth Business Day, where there is insufficient capacity, to revert to the Requesting Licensee. In the case where there is insufficient capacity, OpenNet shall notify the Requesting Licensee within three (3) Business Days to keep the Requesting Licensee informed.

Accordingly, IDA directs OpenNet to delete the former clause 5.4 in its entirety.

~~5.65.5~~ The Requesting Licensee shall pay OpenNet the applicable Installation Charge specified in Schedule 15 (Charges) for provisioning the Building MDF Room to Residential Premise Connection.

5.75.6 Where OpenNet rejects the Request for the Building MDF Room to Residential Premise Connection, OpenNet shall provide reasons explaining the basis for rejection.

6. DELIVERY

CLAUSE 6.1 - DIRECTED AMENDMENTS

6.1 Subject to clauses 5.2, 5.3, 5.4 and 6.2, OpenNet shall provide the Building MDF Room to Residential Premise Connection by the end of three (3) Business Days from the receipt of a valid Request from the Requesting Licensee, where OpenNet has deployed its Network to the Distribution Point, Final Distribution Point or First Termination Point of the Residential Premise. OpenNet shall use its reasonable endeavours to install the First Termination Point of the Residential Premise during the Requesting Licensee's preferred session.

To facilitate co-ordination with the Requesting Licensee and to minimise the number of visits to the Residential Premise by service providers, IDA considers it reasonable that OpenNet and the Requesting Licensee should agree on a session for the installation of the First Termination Point of the Residential Premise, where OpenNet has only deployed its Network to the Distribution Point or Final Distribution Point.

In addition, as a consequence of IDA's annotations to clause 5, clause 6.1 should also be subject to clause 5.4.

Accordingly, IDA directs OpenNet to amend this clause 6.1 in the manner specified above.

CLAUSE 6.3 - DIRECTED AMENDMENTS

6.2 Where there is insufficient capacity to provide the Building MDF Room to Residential Premise Connection and additional capacity is required to be installed between the Building MDF Room and the First Termination Point of the Residential Premise, OpenNet shall subject to clause 5.2 provide the Building MDF Room to Residential Premise Connection within ten (10) Business Days from the receipt of a valid Request from the Requesting Licensee.

OpenNet shall use its reasonable endeavours to install the First Termination Point of the Residential Premise during the Requesting Licensee's preferred session.

To facilitate co-ordination with the Requesting Licensee and to minimise the number of visits to the Residential Premise by service providers, IDA considers it reasonable that OpenNet and the Requesting Licensee should agree on a session for the installation of the First Termination Point of the Residential Premise, where OpenNet has only deployed its Network to the Distribution Point or Final Distribution Point.

Accordingly, IDA directs OpenNet to amend this clause 6.2 in the manner specified above.

CLAUSE 6.3 - DIRECTED AMENDMENTS

6.3 Where the home owner has previously refused OpenNet's entry to the premise, OpenNet will provide internal cabling within the Residential Premise using PVC trunking up to a maximum distance of 15 metres to the First Termination Point, measured from the point of entry to the Residential Premise to the First Termination Point. If the owner of a Residential Premise requests the installation of internal cabling that exceeds 15 metres, and/or requires the use of deployment technique other than open ducting, OpenNet shall inform the Requesting Licensee and both parties shall mutually agree to a revised implementation timeline which shall not be subject to the provisioning Service Level Guarantee. The Requesting Licensee shall pay the additional charges for installation of internal cabling which exceeds 15 metres in accordance to Schedule 15 (Charges). For the avoidance of doubt, where the owner of a Residential Premise requires the use of deployment technique other than open ducting, such deployment shall be provided by a third party. ~~OpenNet shall inform the Requesting Licensee a revised implementation timeline which shall not be subject to the provisioning Service Level Guarantee.~~

For clarity, clause 6.3 should reflect that the additional charges apply to work undertaken by OpenNet relating to the installation of internal cabling exceeding fifteen (15) metres only as the End-Users are responsible to engage their own contractors if they prefer the use of deployment technique other than open ducting.

Accordingly, IDA directs OpenNet to amend this clause 6.3 in the manner specified above.

6.4 Unless otherwise stated, OpenNet shall retain the responsibility for working at OpenNet's FDF at the Building MDF Room and the First Termination Point, including Patching Service at OpenNet's FDF at the Building MDF Room in accordance with Schedule 13 on Patching Services. The Requesting Licensee shall bear the Charges for such work carried out by OpenNet.

- 6.5 OpenNet will provide the necessary Patching Service at OpenNet's FDF in the Building MDF Room using Patch Cable of not exceeding ten (10) metres in length. The Requesting Licensee shall provide its own patch cable if it requires a longer patch cable. For the avoidance of doubt, where the Requesting Licensee provides its own patch cable, OpenNet will not offer and the Requesting Licensee shall not request for any rebate or discount over the Patching Service or the Building MDF Room to Residential Premise Connection.
- 6.6 OpenNet will use optical fibre cable based on the ITU-T G.652D standard for outdoor installations and the ITU-T G.657A standard for in-building installations (where applicable) to deliver the Building MDF Room to Residential Premise Connection.
- 6.7 OpenNet will test the optical fibre cable from OpenNet's FDF at its designated Building MDF Room to the First Termination Point of the Residential Premise to ensure that the Building MDF Room to Residential Premise Connection falls within the specified optical performance. Testing will be conducted at wavelengths of 1310nm, 1490nm and 1550nm.
- 6.8 OpenNet shall ensure that the optical power loss does not exceed -0.4dB per km and -0.5dB per connector.
- 6.9 OpenNet shall promptly notify the Requesting Licensee upon the completion of provisioning the Building MDF Room to Residential Premise Connection.
- 6.10 Subject to clause 6.11, in the event OpenNet fails to meet the applicable service activation period for a Request, OpenNet shall compensate the Requesting Licensee an amount equal to the number of days of delay multiplied by the weekly recurring charge for the Building MDF Room to Residential Premise Connection, subject to a maximum of 30 times the weekly recurring charge for the Building MDF Room to Residential Premise Connection (**Weekly Recurring Charge**), where:

Weekly Recurring Charge = Monthly recurring charge x 7 / 30

CLAUSE 6.11 – DIRECTED AMENDMENTS

- 6.11 ~~Except for Requests with service activation periods which have been extended beyond the standard service activation period pursuant to clauses 5.4, 5.5 and 6.2,~~ OpenNet shall not be required to compensate the Requesting Licensee under any of the following circumstances:

- (a) Delay in the granting of permission from or permission is not granted by the building owners/management or house owner or End-User to install the required Network to the Residential Premise within the said building;
- (b) Where the owner of a Residential Premise requests the installation of internal cabling that requires more than 15 metres of ducting and/or requires the use of a deployment technique other than open ducting;

FORMER CLAUSE 6.11(c) – DIRECTED AMENDMENTS

~~(c) The Requesting Licensee has requested for a service activation date that is beyond the stipulated service activation period;~~

Arising from IDA's annotations to clause 6.11 requiring OpenNet to compensate the Requesting Licensee if OpenNet fails to meet the revised service activation date, former clause 6.11(c) has become a redundant clause.

Accordingly, IDA directs OpenNet to delete this former clause 6.11(c) in its entirety.

~~(c)~~ The Requesting Licensee requests the deferment of the service activation date; or

~~(d)~~ The building which was initially under network coverage has been reconstructed and OpenNet has to reinstall its Network to the building.

For the avoidance of doubt, where the service activation date has been revised pursuant to any of the circumstances contemplated in this clause 6.11 or elsewhere in this ICO Agreement (unless otherwise stated), OpenNet shall nevertheless be required to compensate the Requesting Licensee if it fails to meet the revised implementation timeline.

As explained in IDA's Directed Modifications, IDA expects OpenNet to keep to the revised request service activation date for all the scenarios listed in clause 6.11 above, failing which the relevant Service Level Guarantees will apply. IDA also considers it fair and reasonable that OpenNet shall be required to compensate the Requesting Licensee the relevant Service Level Guarantees for failure to meet the revised service activation date, if OpenNet agrees to a revised service activation date under the ICO Agreement, unless otherwise stated. IDA notes that there is no extension of service activation date under clauses 5.4, 5.5 and 6.2.

Accordingly, IDA directs OpenNet to amend this clause 6.11 in the manner specified above.

7. RESPONSIBILITY AT OPENNET FDF

7.1 The Requesting Licensee shall not, and shall ensure that its employees, agents and contractors do not, at any time access OpenNet's FDF at the Building MDF Room.

7.2 Where the Requesting Licensee wishes to change the existing patching connection at OpenNet's FDF at the Building MDF Room, the Requesting Licensee shall submit an application for termination of the existing Patching Service and order for a new Patching Service at the Building MDF Room in accordance with Schedule 13 (Patching Service).

8. DEACTIVATION

8.1 Subject to the minimum contract term, the Requesting Licensee may terminate the Building MDF Room to Residential Premise Connection by giving OpenNet not less than one (1) month prior written notice.

CLAUSE 8.2 - APPROVED

8.2 If the Building MDF Room to Residential Premise Connection is terminated by the Requesting Licensee pursuant to clause 8.1 before the expiry date of the minimum contract term, the Requesting Licensee must pay OpenNet one hundred percent (100%) of the Monthly Recurring Charge for the remainder of the minimum contract term.

8.3 Where any Patching Service is no longer required as a result of the termination of the Building MDF Room to Residential Premise Connection, OpenNet shall remove the Patching Service at all the relevant access points and the Requesting Licensee shall be liable for the termination charges in accordance with Schedule 15 (Charges). Notwithstanding the above, the Requesting Licensee shall not be liable to pay any Charges for the removal of Patching Service related to or in connection with the termination of the Building MDF Room to Residential Premise Connection, if such termination is the result of OpenNet's fault.

9. STANDARD TERMS AND CONDITIONS

- 9.1 OpenNet shall at its sole discretion determine its network deployment, including but not limited to the access points, fibre cable routing and location of the Building MDF Room from which the Building MDF Room to Residential Premise Connection is provided.

CLAUSE 9.2 - DIRECTED AMENDMENTS

- 9.2 OpenNet shall be responsible for the maintenance of the Building MDF Room to Residential Premise Connection, ~~excluding all Patching Services~~ installed under this Schedule. ~~The terms and conditions of Patching Services provided are set out in Schedule 13 (Patching Service). For the avoidance of doubt, if there is a fault at the Patch Cable, OpenNet will not charge the Requesting Licensee an additional Patching Charge if OpenNet (or, its contractors and/or suppliers) was solely and directly responsible for the fault at the Patch Cable.~~

Under clause 11.4, OpenNet is responsible for replacing a faulty patch cable (OpenNet is entitled to impose a Patching Charge on the Requesting Licensee if the Requesting Licensee is responsible for the fault). In this regard, to avoid confusion, clause 9.2 should not exclude Patching Services from the maintenance of the Building MDF Room to Residential Premise Connection. In addition, it is irrelevant to mention that the terms and conditions of Patching Services provided shall be pursuant to Schedule 13 (Patching Service).

Accordingly, IDA directs OpenNet to amend this clause 9.2 in the manner specified above.

- 9.3 Except to the extent strictly necessary to accurately describe the service to actual or potential Customers, the Requesting Licensee shall not use OpenNet's name, any of OpenNet's trademarks or the fact that any service is supplied using OpenNet's Network in promoting the Requesting Licensee's service.
- 9.4 The Parties shall in good faith co-operate with each other and take reasonable measures to ensure that there is no interference with or deterioration to OpenNet's existing services or those of a Third Party as a result of the Requesting Licensee's use of the Building MDF Room to Residential Premise Connection.

CLAUSE 9.5 - APPROVED

- 9.5 If it is necessary to carry out any scheduled service interruption, including but not limited to planned repair, or replacement or upgrade to any equipment or facility forming part of the Building MDF Room to Residential Premise Connection, OpenNet shall provide the Requesting Licensee with at least one (1) month's written notice in advance of such interruptions, repairs or upgrades. OpenNet shall take reasonable measures to minimise any service disruption to the Requesting Licensee.

CLAUSE 9.6 – DIRECTED AMENDMENTS

- 9.6 If the scheduled service interruption affects Building MDF Room to Residential Premise Connections, OpenNet will ~~endeavour to~~ carry out the scheduled service interruption between 1am and 6am, unless it is not feasible for OpenNet to do so.

IDA refers to IDA's 20 August 2009 Decision varying IDA's 3 July 2009 Directed Modifications to allow OpenNet to carry out scheduled service maintenance outside of the 1:00am and 6:00am timeframe where it is unavoidable for OpenNet to do so within the specified timeframe. OpenNet's proposed modifications do not provide assurance to Requesting Licensees that OpenNet will carry out all planned service maintenance within the specified timeframe unless it is unavoidable for OpenNet to do so.

Accordingly, IDA directs OpenNet to amend this clause 9.6 in the manner specified above.

CLAUSE 9.7 - APPROVED

- 9.7 Subject to Requesting Licensee acquiring redundancy service, OpenNet shall, where technically feasible, provide assistance to Requesting Licensee to divert its Building MDF Room to Residential Premise Connection to the redundancy service before commencing the scheduled service interruption.
- 9.8 Where there are available resources, OpenNet will, where possible, first divert critical links to alternative routings before commencing the scheduled service interruption.

CLAUSE 9.9 – DIRECTED AMENDMENTS

9.9 Subject to clause 9.6, OpenNet shall not be liable for any loss caused by such scheduled service interruption, except for the Service Level Guarantee rebate that arises from OpenNet carrying out the scheduled service interruption outside of the stipulated period and the Requesting Licensee has reported the fault in accordance to clause 11.

IDA does not agree with OpenNet's comment that clause 12.3 fully addresses IDA's 3 July 2009 Directed Modifications to clause 9.9 requiring OpenNet to propose a suitable remedy where a scheduled service interruption is carried out outside of the stipulated period.

Accordingly, IDA requires OpenNet to amend this clause 9.9 in the manner specified above.

9.10 The Requesting Licensee shall be responsible to the Requesting Licensee's Customers for all aspects of the Requesting Licensee's services including but not limited to the operations and maintenance of the Requesting Licensee's service.

CLAUSE 9.11 - APPROVED

9.11 The Requesting Licensee must procure and maintain at its own cost:

- (a) any equipment or software needed to implement, receive or use the Building MDF Room to Residential Premise Connection (including but not limited to any configuration of the NTE at the Residential Premise); and
- (b) any space at the Building MDF Room for its equipment.
- (c) access to the Residential Premise.

9.12 Nothing in this Schedule vests in the Requesting Licensee any right, title or proprietary interest in the optical fibre cable, equipment or facilities forming part of the Building MDF Room to Residential Premise Connection.

10. ACCESS AND APPROVALS REQUIRED

10.1 The Parties shall comply with clause 15.5 of the main body of this ICO Agreement in relation to the obtaining of all licences, permits, consents, waivers,

authorisations and intellectual property or other rights required for the provision of the Building MDF Room to Residential Premise Connection.

11. FAULT REPORTING AND CLEARING

11.1 Each Party must have or establish a Fault Reporting and Control Centre (**FCC**) to act as a single point of contact for the reporting, management and clearing of faults. The FCC must be available twenty-four (24) hours a day, seven (7) days a week.

11.2 It is the Requesting Licensee's responsibility to determine the source of the fault at its own cost and to ensure that the fault does not lie within its own network before reporting the fault to OpenNet.

CLAUSE 11.3 - APPROVED

11.3 Upon receipt of a fault report from the Requesting Licensee under clause 11.2, OpenNet shall investigate the cause of the fault experienced by the Requesting Licensee in a diligent and responsible manner as would be expected of a competent service provider. OpenNet shall update the Requesting Licensee as and when there is a change in status of the fault investigation/rectification work.

CLAUSE 11.4 – DIRECTED AMENDMENTS

11.4 If, following investigation, OpenNet determines that the fault is at the Patch Cable at the Building MDF Room, OpenNet will replace with another Patch Cable and charge the Requesting Licensee a Patching Charge in accordance with Schedule 15 (Charges). OpenNet will ~~not~~ charge the Requesting Licensee a Patching Charge if ~~OpenNet (or, its contractors and/or suppliers)~~ the Requesting Licensee was ~~solely and directly~~ responsible for the fault at the Patch Cable at the Building MDF Room.

As the responsibility for the Patch Cable at the Building MDF Room lies with OpenNet, OpenNet should only charge the Requesting Licensee a Patching Charge if the fault at the Patch Cable at the Building MDF Room is caused by the Requesting Licensee.

Accordingly, IDA directs OpenNet to amend this clause 11.4 in the manner specified above.

11.5 If, following investigation, OpenNet determines that no fault is found or the fault is not with the OpenNet Network or equipment, then OpenNet shall charge the

Requesting Licensee a No Fault Found Charge for the fault report in accordance with Schedule 15 (Charges).

- 11.6 If OpenNet is unable to identify any fault, OpenNet will call for a fault identification coordination meeting between OpenNet and the Requesting Licensee to identify the fault. The Requesting Licensee shall provide all reasonable assistance requested by OpenNet. Each Party is to bear its own cost for attending such fault identification coordination meeting as well as any testing or trouble-shooting activities required as a result of such a meeting.
- 11.7 The Building MDF Room to Residential Premise Connection is deemed to be restored when OpenNet has tested and confirmed to the Requesting Licensee that the Building MDF Room to Residential Premise Connection has been restored.
- 11.8 Where the Requesting Licensee has lodged with OpenNet a fault report and OpenNet is in the process of investigating the fault or where the Requesting Licensee has not lodged a fault report but suspects that there is a fault with the Building MDF Room to Residential Premise Connection, the Requesting Licensee may request OpenNet for a joint investigation. The Requesting Licensee shall propose the date, time and venue for the joint investigation. Subject to OpenNet's resource availability and agreement to the date, time and venue, OpenNet shall attend the joint investigation and charge the Requesting Licensee the Joint Investigation Charge according to Schedule 15 (Charges).

CLAUSE 11.9 – DIRECTED AMENDMENTS

- 11.9 The Requesting Licensee acknowledges that OpenNet may temporarily disconnect the Requesting Licensee's Building MDF Room to Residential Premise Connection to perform reasonable fault analysis and line testing on the Building MDF Room to Residential Premise Connection. OpenNet shall conduct such disconnection only as it reasonably considers necessary. OpenNet shall notify the Requesting Licensee at least thirty (30) minutes before the temporary disconnection and provide its reasons for the temporary disconnection.

IDA refers to IDA's 3 July 2009 Directed Modifications requiring OpenNet to modify clause 11.9 such that any temporary disconnection by OpenNet under clause 11.9 to perform fault analysis and line testing on the Building MDF Room to Residential Premise Connection must in its reasonable discretion, be considered necessary.

Accordingly, IDA directs OpenNet to amend this clause 11.9 in the manner specified above.

11.10 Each Party shall maintain and store its own records of faults and repairs.

Mean Time To Recovery

11.11 OpenNet shall restore fault within a standard Mean Time To Recovery (**MTTR**) of eight (8) hours.

CLAUSE 11.12 - DIRECTED AMENDMENTS

11.12 Subject to clause 2.6, the MTTR is the average time OpenNet took to restore service for all fault incidents for all Building MDF Room to Residential Premise Connections acquired by the Requesting Licensee under this Schedule during a month, measured from the time each fault is reported by the Requesting Licensee to the time OpenNet confirms that the fault is restored, excluding fault incidents where OpenNet is prevented or restricted from restoring the service owing to matters that are not within OpenNet’s control. For the avoidance of doubt, the MTTR is calculated as follows:

$$\frac{\sum X}{Y}$$

Where X = Time taken to restore fault incidents for each Building MDF Room to Residential Premise Connection during a month as described above

Y = Total number of affected Building MDF Room to Residential Premise Connections in the same month

For clarity, IDA directs OpenNet to amend this clause 11.12 to specify the formula for the computation of the MTTR in the manner specified above.

11.13 In the event OpenNet fails to meet the standard MTTR for a particular month, OpenNet shall compensate the Requesting Licensee an MTTR Rebate equal to the difference between the MTTR experienced by the Requesting Licensee and the standard MTTR in terms of number of days, multiplied by the number of services affected, multiplied by the Weekly Recurring Charge for the Building MDF Room to Residential Premise Connection, subject to a maximum of 30 times the Weekly Recurring Charge for the Building MDF Room to Residential Premise Connection.

12. SERVICE LEVEL AVAILABILITY

12.1 OpenNet shall offer a service level availability of 99.99% per month for the Building MDF Room to Residential Premise Connection. OpenNet shall offer to rebate the Requesting Licensee ten percent (10%) of the Monthly Recurring Charge if OpenNet fails to meet the service level availability for that month.

12.2 Service level availability for the Building MDF Room to Residential Premise Connection is calculated as follows:

$$\frac{(A - B)}{(A)} \times 100\%$$

Where A = 24 hours x number of days for the month (in hours); and

B = total network outage time for the Building MDF Room to Residential Premise Connection in the same month (in hours)

12.3 Subject to clause 2.6, the total network outage time is the sum of all minutes for which the Building MDF Room to Residential Premise Connection is unavailable measured from the time each fault is reported by the Requesting Licensee to the time OpenNet confirms that the fault is restored, excluding fault incidents where OpenNet is prevented or restricted from restoring the service owing to matters that are not within OpenNet's control.

13. PROTECTION AND SAFETY

13.1 Each Party is responsible for the safe operation of its Network and in particular the safe operation of equipment within its Network on its side of the connection at the FDF in the Building MDF Room and at the Residential Premise.

13.2 Each Party shall, so far as reasonably practicable, take all necessary steps to ensure that the licence of the Building MDF Room to Residential Premise Connection, its operations and its implementation of this Schedule:

- (a) do not endanger the safety or health of any person, including the employees and contractors of the Parties; and
- (b) do not damage, interfere with or cause any deterioration in the operation of the OpenNet Network.

14. TERM OF LICENCE

14.1 The minimum contract term for the Building MDF Room to Residential Premise Connection shall be twelve (12) months starting from the service activation date of the Building MDF Room to Residential Premise Connection.

15. SUSPENSION

CLAUSE 15.1 - APPROVED

15.1 OpenNet may suspend the Requesting Licensee's licence to the Building MDF Room to Residential Premise Connection at any time until further notice to the Requesting Licensee if the Building MDF Room to Residential Premise Connection licence causes or is likely to cause physical or technical harm to any telecommunications network, system or services (whether of OpenNet or any other person) including but not limited to causing damage, interfering with or causing deterioration in the operation of the OpenNet Network. If the suspension is the result of the Requesting Licensee's fault, the Requesting Licensee shall continue to pay the Monthly Recurring Charge during the period of suspension.

15.2 Without limiting the exclusions or limitations of liability in this ICO Agreement, OpenNet shall not be liable to the Requesting Licensee for any Loss resulting from, or in connection with, suspension of the Building MDF Room to Residential Premise Connection licence under this clause 15.

16. TERMINATION OF LICENCE

16.1 The Requesting Licensee shall keep OpenNet informed on the Requesting Licensee's utilisation of each Building MDF Room to Residential Premise Connection six (6) months from the service activation date and when there are changes to the utilisation.

CLAUSES 16.2 AND 16.3 – DIRECTED AMENDMENTS

16.2 The Requesting Licensee must use or activate a service to a Retail Service Provider using the Building MDF Room to Residential Premise Connection within six (6) months from the service activation date of the Building MDF Room to Residential Premise Connection. If the Requesting Licensee fails to do so, OpenNet will deactivate the Building MDF Room to Residential Premise Connection upon giving the Requesting Licensee ten (10) Business Days prior notice, and the Requesting Licensee did not dispute such written notice given by

OpenNet. The Requesting Licensee must pay OpenNet the Monthly Recurring Charges for the remainder of the minimum contract term.

~~16.316.3 OpenNet may terminate the licence in respect of the Building MDF Room to Residential Premise Connection after giving the Requesting Licensee ten (10) Business Days prior written notice if: (1) the Requesting Licensee abandons its Building MDF Room to Residential Premise Connection; or (2) the Requesting Licensee is not providing any service over the Building MDF Room to Residential Premise Connection; and the Requesting Licensee did not dispute such written notice by OpenNet.~~

IDA notes that clause 16.2 and former clause 16.3 are largely repetitive and directs OpenNet to merge the two clauses in the manner specified above.

CLAUSE 16.3 - APPROVED

16.416.3 OpenNet may immediately terminate a licence of the Building MDF Room to Residential Premise Connection under this Schedule if:

- (a) the Requesting Licensee is no longer an FBO;
- (b) the OpenNet ICO is revoked by the Authority under clause 12.8 of the ICO Agreement;
- (c) the Authority removes the requirement for OpenNet to supply the Building MDF Room to Residential Premise Connection under the OpenNet ICO or exempts OpenNet from supplying the Building MDF Room to Residential Premise Connection under the ICO Agreement, provided that the date of termination shall not be earlier than the effective date of the Authority's decision;
- (d) in OpenNet's reasonable opinion, the Requesting Licensee is using the Building MDF Room to Residential Premise Connection in contravention of an applicable law, licence, code, regulation or direction and OpenNet has the necessary confirmation from the relevant Government Agencies that the Requesting Licensee is in contravention of the applicable law, licence, code, regulation or direction;
- (e) in OpenNet's reasonable opinion, the Requesting Licensee is using the Building MDF Room to Residential Premise Connection in a manner which places or allows a Third Party to act in contravention of an

applicable law, licence, code, regulation or direction and OpenNet has the necessary confirmation from the relevant Government Agencies that the Third Party is in contravention of the applicable law, licence, code, regulation or direction;

- (f) the licence in respect of Co-Location Space to which the Building MDF Room to Residential Premise Connection is connected has been terminated or has expired;
- (g) the Building MDF Room to Residential Premise Connection has become unsafe for its purpose; or
- (h) OpenNet's right to own, maintain or operate the Building MDF Room to Residential Premise Connection has been revoked or terminated or has expired.

CLAUSE 16.4 - APPROVED

~~16.5~~16.4 Either Party (**Terminating Party**) may terminate the Building MDF Room to Residential Premise Connection:

- (a) if the other Party is in breach of this Schedule other than failure to pay any sum for which the Requesting Licensee has been invoiced, and such breach remains un-remedied for a period of sixty (60) Calendar Days after receiving notice from the Terminating Party;
- (b) if the Requesting Licensee's Building MDF Room to Residential Premise Connection licence has been suspended pursuant to clause 15.1, and the cause of such suspension has not been remedied or rectified for a period of sixty (60) Calendar Days from the date of the suspension; or
- (c) if the Requesting Licensee is in breach of this Schedule by its failure to pay any sum for which the Requesting Licensee has been invoiced, and such breach remains un-remedied for a period of fourteen (14) Calendar Days after receiving notice from the Terminating Party. For the avoidance of doubt, this sub-clause shall not apply pending the resolution of any Billing Dispute in accordance with the provisions of Schedule 16 (Billing).

CLAUSE 16.5 – DIRECTED AMENDMENTS

16.616.5 Upon ~~expiry or~~ termination of the licence of the Building MDF Room to Residential Premise Connection:

- (a) the Requesting Licensee must immediately discontinue use of the Building MDF Room to Residential Premise Connection;

IDA considers that there is merit to make clear that unless the Requesting Licensee requests to terminate the Building MDF Room to Residential Premise Connection service, the licence of Building MDF Room to Residential Premise Connection will not expire upon the expiry of the minimum contract term.

Accordingly, IDA directs OpenNet to amend this clause 16.5 in the manner specified above.

CLAUSE 16.5(b) - DIRECTED AMENDMENTS

- (b) the Requesting Licensee must ~~promptly and~~ without undue delay disconnect all equipment connected to the Building MDF Room to Residential Premise Connection; and

IDA recognises that OpenNet needs to be protected from recalcitrant licensees who delay removal of equipment after their licences have expired or been terminated. Yet this must be balanced with the Requesting Licensees' need for sufficient time to remove equipment. On balance, IDA is of the view that the requirement "without undue delay" is reasonable and already sufficient to protect OpenNet's interests.

Accordingly, IDA directs OpenNet to amend clause 16.5(b) in the manner specified above.

- (c) OpenNet shall be responsible for removing all necessary Patching Services at the Requesting Licensee's cost in accordance with Schedule 15 (Charges). Notwithstanding the above, the Requesting Licensee will not be liable for OpenNet's costs of removing all necessary Patching Services, if the termination is the result of OpenNet's fault.

CLAUSE 16.6 – APPROVED

16.716.6 If the Building MDF Room to Residential Premise Connection is terminated as a result of the Requesting Licensee's fault, the Requesting Licensee shall be liable to OpenNet for the Monthly Recurring Charges for the remainder of the minimum contract term.

16.816.7 If the Requesting Licensee fails to disconnect its equipment from the Building MDF Room to Residential Premise Connection under clause 16.6(b), OpenNet may at its sole discretion remove and/or dispose of the Requesting Licensee's equipment. The Requesting Licensee shall pay to OpenNet all reasonable costs associated with the work undertaken by OpenNet including the cost of disposing the Requesting Licensee's equipment. The Requesting Licensee shall have no claim whatsoever against OpenNet in connection with the removal and/or disposal of the Requesting Licensee's equipment from the Building MDF Room to Residential Premise Connection.

17. REDUNDANCY SERVICE

CLAUSE 17.1 – DIRECTED AMENDMENTS

17.1 The Requesting Licensee may acquire one separate fibre strand from OpenNet's FDF at the Building MDF Room to the First Termination Point of the Residential Premise (**Redundancy Service**) at the same prices, terms and conditions as the Building MDF Room to Residential Premise Connection through a request in the form of Annex 8A, unless stipulated otherwise in this clause 17.

IDA deems that in addition to amending Annex 8A to provide an option for Requesting Licensee to order the Redundancy Service for the Building MDF Room to Residential Premise Connection, it is also necessary for OpenNet to indicate in the main Schedule 8 that the Redundancy Service can be requested through Annex 8A.

Accordingly, IDA directs OpenNet to amend this clause 17.1 in the manner specified above.

17.2 OpenNet shall provide the Redundancy Service via the same duct and along the same path as the existing Building MDF Room to Residential Premise Connection, without Duct Diversity and without Path Diversity. OpenNet may provide the Redundancy Service using a separate fibre strand from the same fibre cable that carries the existing Building MDF Room to Residential Premise Connection.

CLAUSE 17.3 – DIRECTED AMENDMENTS

17.3 The Requesting Licensee is eligible to acquire a Redundancy Service for the Building MDF Room to Residential Premise Connection provided the Requesting Licensee has acquired or is acquiring an equivalent Building MDF Room to Residential Premise Connection between the same Building MDF Room and Residential Premise. The Requesting Licensee may request OpenNet to reject the Request for the Building MDF Room to Residential Premise Connection in the event that OpenNet is unable to provide the Redundancy Service, but such Requests for the Building MDF Room to Residential Premise Connection and the Redundancy Service must be submitted together to OpenNet.

OpenNet should provide Requesting Licensee an option for OpenNet to reject the Request for Building MDF Room to Residential Premise Connection if OpenNet is unable to provide the Redundancy Service as certain End-Users have strict redundancy service requirements and may not wish to proceed with procuring the Building MDF Room to Residential Premise Connection without the associated Redundancy Service.

Accordingly IDA directs OpenNet to amend this clause 17.3 and Annex 8A in the manner specified.

17.4 The Requesting Licensee shall be responsible, at its own cost and equipment, for the implementation of diversity or redundancy for its services using the Redundancy Service provided by OpenNet.

CLAUSE 17.5 - DIRECTED AMENDMENTS

17.5 OpenNet shall make the Redundancy Service available to the Requesting Licensee, except where OpenNet is unable to build the requisite infrastructure (other than fibre) to provide the Redundancy Service or due to any of the reasons stated in clause 5.4.

Upon further review, IDA considers it fair and reasonable that for consistency, OpenNet should be allowed to reject a request for the Redundancy Service on the same grounds as that for rejecting a request for a Building MDF Room to Residential Premise Connection service as set out in clause 5.4.

Accordingly, IDA directs OpenNet to amend this clause 17.5 in the manner specified above.

Redundancy Service is not available

IDA refers to IDA's annotations to clause 17.3 and directs OpenNet to amend Annex 8A in the manner specified above.

DIRECTED AMENDMENTS

The Requesting Licensee acknowledges that by submitting this Request Form, it undertakes to pay any additional charges which may be imposed by OpenNet pursuant to ~~(but not limited to)~~ clause 6.3 of Schedule 8. For avoidance of doubt, the Requesting Licensee is still liable for the applicable Monthly Recurring Charge and one-time charges.

While OpenNet has amended Annex 8A to enable the Requesting Licensee to give a pre-approval to OpenNet for the additional charges that OpenNet may impose for installing internal cabling exceeding fifteen (15) metres, the pre-approval appears to extend beyond the charges contemplated under clause 6.3. However, IDA recognises that OpenNet may wish to make clear that the Requesting Licensee is liable for the applicable Monthly Recurring Charge and one-time charges for this service.

Accordingly, IDA directs OpenNet to amend Annex 8A in the manner specified above.
