

Robotics software platform

Pioneering intelligent 3D scanning & AI robot motion planning tools

Scan

Plan

Simulate

Deploy

Benefits

Proprietary solutions, easy & rapid digitalisation

Automated robot path development & intuitive graphical interface

No coding required

Eliminates need for coding & CAD files in robot teaching

Automates complex robotic processes

Robotic sandblasting, shot peening, sanding, painting, spraying & welding

Eliminates time, cost & skill barriers

For faster recovery of ROI in automation

Ideal for manufacturers

Automotive, aerospace and welding industries
