

Generative AI that transforms real data into useful & unlimited synthetic data with real data qualities

Achieve 100% compliance with local, regional & international data protection regulations with near zero data privacy & leakage risks

Real Data

VS

Synthetic Data

Takes 3-24 months to collect
Data cannot be stored indefinitely

Takes just 3-24 days to collect
Data can be stored indefinitely

Has ethical & privacy concerns

Eliminates ethical & privacy concerns
using Generative AI and Privacy Engineering

Can be traced to real users

End-to-end privacy by design
No re-identification of real users,
yet retains statistical value of real data

Data licensing & IP issues

Data can be licensed & monetized
with data owners retaining 100% IP ownership
