Annex B – Full name list of the SG100WIT List 2021

S/No	Name	Designation	Bio
1.	AGARWAL Neha	Vice President, IT Audit, Citibank	Through her work in IT audit and advisory with consulting firms and banks, Neha enables businesses to exploit IT systems effectively and securely. She is a voluntary tech educator teaching Scratch programming to underprivileged kids through Google's and IMDA's code in the community programme. She has also worked with the KPMG cybersecurity team to deliver several cyber safety talks to Singaporean youths.
2.	AHMED Anansa	Managing Director and CTO, QuikPath	A PhD candidate from Nanyang Technological University, Anansa founded the MedTech company QuikPath to alleviate COVID-19 testing in early 2020. QuikPath's test eventually became the first indigenously developed colorimetric diagnostic solution to be registered in Singapore. Her vision is to grow QuikPath into a diversified and gender inclusive company that provides diagnostic solutions to anyone, anywhere.
3.	ANEES Ayesha	Co-founder and CTO, OrdiSense	Ayesha is an ardent advocate for AI in healthcare. Her desire to translate research into practical solutions led her to co-found OrdiSense, a company that utilises the power of AI and IoT for smarter and more efficient management of healthcare-acquired infections. In a nutshell, they are building an end-to-end facility monitoring system that acts like a Fitbit for hygiene health of a hospital ward.
4.	CAI Kui	Associate Professor, Singapore University Technology and Design	Cai Kui's work as a distinguished scientist for the last 20 years has contributed significantly to the advancement of ICT and data storage technologies for Singapore. Her patents on coding have been licensed to MNCs like Marvell Technology. In the past 18 months, she has successfully received research grants from the

			Ministry of Education and defence agencies, published 29 papers in prestigious journals and filed one patent.
5.	CHAN Chi Ling	Co-founder, Better.sg	As Deputy Director, Open Government Products at GovTech, Chi Ling led a product team to build a suite of systems and web applications for the COVID-19 vaccination programme and antigen rapid testing, which helped to accelerate the re-opening of the economy and society in Singapore. She is also co-founder of Better.sg, a volunteer-run non-profit organisation that drives #techforgood in Singapore.
6.	CHAN Queenie	Head of Strategy and Transformation, Consumer Private & Business Banking (CPBB), Standard Chartered Bank	At Standard Chartered, Queenie leads the Diversity and Inclusion for CPBB Technology where she is involved in various initiatives, including "Women Who Engineer (WoWE)" – a platform showcasing junior female engineers and their career journeys to increase their visibility and confidence. Outside of work, she is director of a social enterprise helping underprivileged women in Southeast Asia express their creativity and develop their potential via digital channels.
7.	CHAN Wei Ee, Gayle	Deputy Chief Executive (Information), Defence Science and Technology Agency (DSTA)	Gayle steers the organisation's digital transformation journey, harnessing digital technologies such as AI, data analytics, cloud and cybersecurity to develop capabilities for defence and security. She spearheaded the setting up of DSTA's Digital Hub to ideate, experiment and rapidly prototype new capabilities. She conceptualised BrainHack to extend DSTA's popular cybersecurity youth camp into the areas of AI, information systems and even space technology.
8.	CHAN Yiwen, Alexis	Co-founder, Hire Digital	Alexis founded Hire Digital in 2015 to provide on-demand talents in areas like digital marketing and media. She works with hundreds of organisations - from Fortune 500 enterprises to startups - to connect businesses with skilled digital marketers,

			software developers and designers on demand. This flexible operational model has been embraced by the likes of Unilever and Shopify. She was selected as a Forbes 30 Under 30 Asia recipient in its inaugural year in 2016.
9.	CHAWRA Jaanvi	Vice President, OCBC	Jaanvi is a return-to-work mother after a three-year break. She did not miss a beat, picking up where she left off and diving deep into digital transformation projects at the bank. She works with diverse teams comprising product managers, business managers, software engineers and infrastructure teams to put together cutting-edge technology solutions. Jaanvi's current focus is to apply agile development methods to Agile@Scale and maturing Agile capability, so her teams can focus on driving quick, effective and scalable change.
10.	CHEN Nancy	Group Leader, Senior Scientist and Principal Investigator, Institute for Infocomm Research, A*STAR	Dr Chen is spearheading efforts in AI for education. In particular, she develops conversational AI technology to help children learn languages. Her team has developed proprietary Malay and Tamil speech evaluation systems, which have been deployed through the Interactive Portal for Mother Tongue Languages (iMTL Portal) by the Ministry of Education in Singapore. Her research in speech, language and dialogue processing is also driving potential virtual nurse applications to help patients with chronic diseases in ongoing collaborations with SingHealth.
11.	CHEN Petty	Director Medical Products, ASUS	Petty is an award-winning researcher and practicing surgeon in paediatric plastic and reconstructive surgery, breast surgery, and obstetrics and gynaecology at KK Women's and Children's Hospital and Singapore General Hospital. At ASUS, she leads international teams in building world-class AI/ML and precision health products. Since 2020, her work implementing real-time locating system patient tags at Sengkang General Hospital has

			been critical to contact tracing efforts during the COVID-19 outbreak.
12.	CHIANG Yoke Fun	Senior Vice President and Head, Singapore Digital Business, Digital System, ST Engineering	Yoke Fun is a well-respected leader and technologist and has achieved many firsts in the company. She was the first woman speaker at the inaugural ST Engineering global event, the first woman leader to set up the Data Analytics and AI business unit and the first to lead the Singapore Digital Business Unit. She relishes the opportunity to shape the organisation, build talent, grow the business, deliver value to customers and contribute to national objectives.
13.	CHONG Boon Sim	Principal Industrial Engineer, Razer	A designer at heart with a strong business acumen, Boon Sim is a rare breed who balances the art of designing with commercial needs. At Razer, she thrives as a female industrial designer behind some of the company's most well-loved products, including the iconic Razer DeathAdder gaming mouse that has sold more than 10 million units! Most recently, she took the gaming world by storm with her design of a brand-new product line of gaming chairs.
14.	CHONG Isabel	Country General Manager, SEA, Eaton	Isabel leads the electrical division unit that helps data centres, power plants and other critical industries manage their power in the most reliable, efficient and safe manner. She has expanded the company's customer base by 30 per cent, leading aggressive growth in the data centre segment. She has also played a critical role in driving the growth of Eaton's electrical business in Southeast Asia.
15.	CHUA Eileen	Managing Director, SAP Singapore	A technology leader with over 20 years of experience, Eileen promotes reverse mentoring in teams to encourage an inclusive learning culture. As an advocate of workforce mobility and a champion of diversity and inclusion at the workplace, she

			understands the importance of empowering people managers and equipping them with the right leadership skills to manage an increasingly diverse and remote talent pool as well as prioritising physical and mental health and well-being.
16.	CHUA Horng Shya	Managing Director, Oracle Singapore	At Oracle Singapore, Horng Shya is driving the business' vision of Customer-First – offering customers a virtually seamless set of services and support. Moving ahead, she will continue to help organisations in Singapore accelerate their digital vision. Horng Shya believes people are the key to the success of a business. She leads by providing clarity in vision, strategy and direction. She is a champion of women empowerment and has mentees inside and outside of work.
17.	CHUA Jacqueline	Director of New Product Introductions, HP Inc	Jacqueline heads HP Inc's Research & Development and New Product Introductions organisation in Singapore to develop new technologies and bring new products to markets. As a senior leader on the technology track, she is passionate about advocating for women in STEM, and regularly mentors and sponsors women in leadership and technical roles to support their career development journeys. She is a founding member of the Singapore chapter of the Society of Women Engineers, launched in June 2021.
18.	DANG Thao	Head of Data & AI and Enterprise Modernisation, Platforms and Cloud, Thoughtworks SEA	Thao was the first female to be appointed Head of Technology for Southeast Asia at Thoughtworks. She now helms both the Data & AI and Enterprise Modernisation, Platforms and Cloud service lines in the firm. She strongly believes in the need to support women in exploring careers in tech, and has been mentoring and empowering girls as young as 11 at Little Miss Geek and Coding Girls.

19.	DAVIS Stephanie	Vice President, Google Southeast Asia	An approachable leader and passionate champion for diversity, equity and inclusion, Stephanie continues to look for ways to leverage her influence and access to resources to make technology accessible to everyone. During the pandemic, she focused her efforts on empowering Singaporeans by supporting SMBs through training and reskilling local talent. She spearheaded the launch of the SME Leadership Academy to support 4,000 SMEs with a focus on the retail, tourism and F&B sectors.
20.	DEVANATHAN Sandhya	Vice President, APAC, Global Gaming, Facebook	Sandhya leads a strong, diverse team running a key business that is one of the five top sectors at Facebook. She is passionate about having more women leaders in the gaming industry, especially when half the gamers in the world are made up of women. She is the executive sponsor for Women in Gaming, a Facebook initiative to change the statistics.
21.	DUHAMEL Wu Ling, Aurore	Digital Innovation Manager, Singapore Airlines	At only 28 years old, Aurore has made her name as an innovator in the sphere of blockchain. Her first significant impact in the aviation space is the launch of the first industry scale blockchain initiative. Aurore is a well-known KOL in aviation innovation and has been nominated for numerous awards. She worked for several Singapore startups before joining Singapore Airlines' KrisLab in 2021 to drive digital innovation and support the airline's business and technology transformation initiatives.
22.	FAUZI Liyana	Lead Product Manager, GovTech	Liyana is currently a lead product manager and core leader of CODEX, whose mission is to transform the Singapore Government through delivering the Singapore Government Tech Stack and Government on Commercial Cloud. She hopes to help public agencies build a collaborative engineering culture and unlock the benefits of commercial cloud. Liyana also volunteers

			with The Codette Project, an initiative to enable more minority/Muslim women to gain success in technology.
23.	GAO Yvonne	Principal Investigator, Centre of Quantum Technologies, National University of Singapore	Describing herself as an experimental physicist, Yvonne is building quantum circuits both to study novel phenomena in quantum physics and to perform crucial quantum computing tasks. Currently, she leads a team of enthusiastic young scientists to tackle the challenge of building more robust and scalable quantum devices. Moving forward, their focus is on the preliminary development of a modular quantum processor prototype, fully designed and built in Singapore.
24.	GIN Sharon	Lead Geospatial Consultant, Esri Singapore	As a member of Singapore's leading geospatial solutions provider, Sharon provides consultancy and project management for Enterprise GIS (geographic information system) implementations across various sectors. Her work has resulted in innovative geospatial solutions such as flood impact management and smart district planning, among others, which supports advancing Singapore towards her smart city vision.
25.	GOH Yiping	Partner, Quest Ventures	A serial entrepreneur, Yiping is a role model for women founders. Her career encompasses a resilient journey in both startups and enterprises. Fiercely independent, she founded startups as an undergraduate as early as 2003 when the startup ecosystem was still nascent. The company AllDealsAsia was among the earliest startups to be acquired. She believes in multiplying her impact through putting capital in the founders and companies that can uplift and shape Southeast Asia's growth in the next decades.
26.	HARVEY Brenda	General Manager, APAC, IBM	Brenda is a passionate learner and wants to ensure that all working professionals are equipped with the technical skills of the future. She drives widespread hiring of employees with specific skills in data analytics, AI, automation and cybersecurity and

			promotes technical training throughout the region. A strong advocate for women in technology, she has guided IBM Asia Pacific to appointing over 42 per cent of executive women. She chairs roundtables on women in leadership, and mentors women globally.
27.	HERAVIZADEH Mitra	Managing Director - Global Head, Architecture, Cloud, Engineering & Strategy, Standard Chartered Bank	Mitra has over 20 years of experience as a software engineer and advanced into senior technology leadership roles in architecture, strategy, risk, mergers and acquisitions and technology transformation. In her current role, she leads a central, multi-discipline technology function in the Consumer, Private and Business Banking division within Standard Chartered Bank. She is also passionate about building high performing teams and developing talent and promoting a culture that supports innovation, diversity and inclusion.
28.	HERREMANS Dorien	Assistant Professor, Singapore University of Technology and Design	Dorien's research laid the basis for technologies now used by Aiva, Jukedeck, Spotify and other digital music platforms. She is working on an AI system that can generate music based on the emotions desired by users. Dorien is also developing a new neural network architecture that can represent audio so it can be applied in multiple tasks such as speech recognition, hit song prediction, artist identification and others.
29.	HO Grace	President, SWAT Mobility	Grace led a breakthrough in new markets such as Japan and the Philippines using the SWAT Mobility team's award-winning algorithm, which provides demand-responsive and high-capacity pooling of resources into shared vehicles. This resulted in the company being bestowed the Asean Business Award and winning the SWISSCham Digital Transformation Product Digitalisation prize. She also constantly focuses on developing her teams through active hands-on learning and experimentation.

30.	HO Sabrina	Founder and CEO, Half The Sky	In 2019, Sabrina started Half The Sky, Asia's leading career platform whose mission is to assist women around the world to develop the skills to build a successful career and prepare for the future of work. Through the platform, she has led companies to build a more diverse talent pipeline that is geared towards a workplace that is welcoming of everyone regardless of race, gender, disability, or sexual orientation.
31.	HWEE Susan	Group Management Executive Committee member and Head of Group Technology and Operations, UOB	Susan has been instrumental in building a robust, efficient and scalable technology platform for UOB's operations across the region. Most notably, she co-chaired the Industry Steering Committee that laid the foundation for many of Singapore's real-time innovative payment services such as PayNow. Close to her heart is inclusive employment. Under her stewardship, UOB's employment opportunities for people with autism have received strong recognition, including the highest accolade (Platinum) at the SG Enable Enabling Mark Awards (2021).
32.	JIALDASANI Rajasa	Medical Director, Qritive	At Qritive, Dr Rajasa focuses on the strategic inputs for the development of artificial intelligence-based solutions to advance cancer diagnostics and improve patient outcomes. She has led large tertiary cancer diagnostic laboratories in India and medical affairs of pharmaceutical companies in Singapore to bring innovative oncology drugs to patients. Her business background and understanding of growth has led to millions being committed during investor discussions.
33.	JIANG Jing	Professor Computer Science, Singapore Management University	Jing is a respected researcher and academic in natural language processing (NLP). She has published over 100 papers in many top-tier conferences and journals. Her work is in the application of NLP, proposing new solutions for a range of areas including information extraction, topic modelling, sentiment analysis, social media analysis, and question answering. Besides her teaching

			responsibilities, Jing was Deputy Director of the Living Analytics Research Centre at SMU conducting research on large-scale data analytics to support Singapore's Smart Nation initiatives.
34.	JOHNSON Shelley	Producer, Ubisoft	Shelley is part of the team that is making one of the largest AAA game titles, "Skull & Bones". She is one of the few women producers in the gaming industry and has led over 1,000 people in nine major cities across three different time zones to develop this game. She believes that her team will overcome the pandemic through determination and courage. She contributes to shaping workplace culture, and has been a driving force behind ensuring positive change within the studio.
35.	KALIDASAN Viveka	Technology Development and Commercialisation Lead, Institute of Bioengineering and Bioimaging, A*STAR	Viveka is an innovator and technopreneur. She is also a mentor to various startups, venture creation programmes like UN Women-Entrepreneurship programme, Seedstars and the UK-based cLAB ventures. She is embarking on a new role to commercialise technologies from the Translational Biophotonics Lab, A*STAR and will be championing the development and commercialisation of biophotonic technologies for medtech and femtech applications, eventually spinning out one of them as the founder.
36.	KAN Geraldine	Director, Asia Communications, HP	Geri is a communications professional focused on empowering girls and women in technology to build their influence and communication abilities so that they strengthen their opportunities to advance in their careers and impact their communities. Currently, Geri is the executive sponsor of HP Singapore's Women's Impact Network - an employee-run special interest group aimed at advancing the skills and network women need so that they can thrive at HP, and in their lives.

37.	KANKANHALLI Atreyi	Provost's Chair Professor of Information Systems and Analytics, School of Computing, National University of Singapore	Atreyi is ranked among the top 100 information systems (IS) researchers globally. Several of her innovations have been patented and used worldwide, including at the Maritime and Port Authority of Singapore and at Hewlett-Packard and Microsoft. For her published work on the digitalisation of SMEs, she received the Kauffman Award on Information Systems, Innovation, and Entrepreneurship. Atreyi understands the challenges women in tech face in the industry. Having gone through some of them, she aims to share her experiences with fellow WIT so that they get a leg up.
38.	KHOO Mui Kheng	Group Director, Information Services Group and CIO, Housing & Development Board	As HDB's CIO, Mui Kheng has to cater for the needs of over 3 million residents and 5,000 internal end users. She ensures that mission critical digital services that are public facing (e.g. BTO applications) are operational 24/7, and the IT infrastructure, systems and services are resilient and secure. Her other key focus is to modernise and migrate the organisation's systems to leverage the commercial cloud.
39.	KNOX Aliza	Non-Executive Director and Senior Advisor, Boston Consulting Group (BCG)	Aliza is an experienced tech leader, having been a senior executive at Google, Twitter and Cloudflare. She is devoting more time to mentoring technology leaders especially women. As a Fellow at the Singapore University of Social Sciences, she mentors students who are building startups. Aliza's vast leadership and operational experience will be captured in a book she is writing about rising and thriving in the corporate world, to be published in mid-2022.
40.	KO Sharon	Advanced Security Analytics – Global Black Belt, Microsoft	As a cybersecurity expert, Sharon advises enterprises across Asia on improving their threat detection capabilities. Her current focus is on developing cloud security solutions. Outside of work, Sharon is passionate about training individuals, especially youths and women, to develop skills in cybersecurity. She is a mentor in

			the Advisory Mentorship and Vybe Mentorship programmes and actively participates in startup and women in tech activities.
41.	KOH Joanna	Head of Strategic Programs, PayPal Singapore Development Center	Joanna leads a team of technologists that delivers solutions in partnership with other business functions to serve the company's more than 400 million consumers and merchants worldwide. She is also driving initiatives to champion diversity in tech and advance tech talent in the FinTech industry. With a degree in computer engineering, she understands the career journey of female technologists and aspires to drive effective strategies to attract and retain tech talent.
42.	KOH Li-Na	Assistant Chief Executive, Strategic Planning & Digital Readiness, IMDA	Li-Na is passionate about ensuring that all Singaporeans are able to benefit from digital and technology. At the onset of the pandemic, she set up the SG Digital Office (SDO) and spearheaded various initiatives to help different segments of society adopt digital tools. For example, through the Hawkers Go Digital programme, more than 10,000 stallholders have adopted e-payments. Her contribution to planning and programmes to drive the digital economy has served to position Singapore well for the digital future.
43.	KOOPS Gordana	Regional Sales Director, Ciena	With over 20 years of experience in the telecom industry, Gordana has most recently been instrumental in winning many transformational deals across the Asia Pacific and Japan region. These include projects that enable telcos and enterprises to expand their business beyond only network connectivity, to rapid 5G technology implementations in the post-pandemic era. She is also heavily involved in the Women@Ciena programme, an initiative that supports the organisation's commitment to promoting gender diversity within the workplace.

44.	KRISHNASWAMY Pavitra	Senior Scientist, Institute for Infocomm Research, A*STAR	Pavitra is a researcher and innovator, who develops cutting-edge AI capabilities to address critical needs in the healthcare ecosystem. With her team, she has advanced infrastructure and deep technology to readily leverage real-world patient data for diverse health intelligence applications. Her work has led to 30 intellectual property filings, and several publications in top-tier conferences and journals. She is deeply invested in women's education causes, and derives energy from mentoring students and younger professionals in multidisciplinary endeavours.
45.	KWAN Natasha	General Manager, IBM Singapore	Natasha is a highly driven individual with over 30 years of experience in the IT industry. Her experience has armed her with invaluable insights to applying technology to the healthcare sector. She advocates for population health management underpinned by a digital healthcare framework and a secured data exchange platform that facilitates privacy-preserving health data exchange to deliver more personalised patient care. She believes that harnessing disruptive tech for good will contribute to Singapore being a healthier nation.
46.	LEE Pooi See	Professor, Nanyang Technological University	Pooi See is one of the world's most influential scientists in deformable soft electronics and energy devices for human-machine interface. Her work has resulted in technology translations on flexible sensors and actuators, stretchable wearable electronics, electrochromics and energy harvesters. She holds more than 60 filed and granted patents. Her prolific spirit of technology innovation led to her being elected as a Fellow, National Academy of Inventors 2020, the highest professional distinction accorded to academic inventors.
47.	LEE Sook San, Susan	CIO, Singapore General Hospital	Susan was heavily involved in Singapore's response to the pandemic, and in August 2020, she was awarded the Public Administration Medal (Bronze) for her exemplary leadership,

			efficiency, and competency to Singapore's public healthcare system. She strongly believes in collaborating with various stakeholders to drive digital transformation. Looking ahead, she is identifying new digital technologies including AL models, machine learning algorithms and Internet of Medical Things devices that can be used from hospital to home settings.
48.	LEE Wan Sie	Director, Trusted AI and Data, IMDA	Wan Sie has been instrumental in shaping Singapore's approach to AI governance to build a progressive and enabling environment for AI innovation. She steered the development of practical guidance for the industry to develop and use AI responsibly. Under her leadership, Singapore became one of the founding members of the Global Partnership on AI (GPAI) to continue our contribution to international discourse in building trust in AI.
49.	LEE-LIM Sok Keow	Deputy Principal, Temasek Polytechnic	Sok Keow has made bold steps to ensure the appropriate and timely adoption of relevant ICT tools for teaching, learning, administration and services at Temasek Poly. She set up the institution's own data centre and cloud resources - one of the first polytechnics to do so - to host all IT applications and systems. Her vision is to build further to ensure a digital-to-the-core workforce for the polytechnic and for students to learn in a highly personalised and flexible manner.
50.	LEO Xanne	Founder and CEO, Gorilla Mobile	Xanne is a serial entrepreneur with over 16 years of experience in the financial services industry. She launched a next-generation telco startup, Gorilla Mobile, that provides a new dimension to the mobile communications experience. Gorilla is meant to disrupt the traditional telco market as the first Service on Demand model. Users pay only for what they use, ensuring a fair and modular way of using and paying for mobile services.

51.	LEOW Clara	COO and General Counsel, WhiteCoat	Clara is part of the leadership team of WhiteCoat, a digital healthcare provider offering telemedicine video consultations via an on-demand mobile platform known as the WhiteCoat App. A new concept in 2018, she and her team convinced regulators that telemedication could be a mainstream mode of healthcare delivery. Under her leadership, she spurred her team to deliver operational efficiency, build strategic partnerships and introduce fundraising initiatives.
52.	LI Shiying, Chloe	APAC Data Science Lead, Johnson Controls	Chloe has been instrumental in setting up the data science and AI practices to solve business problems in Johnson Controls APAC. She effectively engaged with different business functions to drive the analytics culture, and spearheaded initiatives boosting revenue growth, cost-saving and digitalisation. Since 2019, she has personally recruited and mentored batches of interns from various backgrounds, including economics, urban planning and computer science.
53.	LIAU Charis	Co-founder and CEO, Minterest	As co-founder and CEO of Minterest, Charis helps businesses and individuals access financial services solutions and investment opportunities. The award-winning leading fintech group aims to give users equal access to institutional investment opportunities via its digital marketplace platform. With Charis at the helm, Minterest is recognised as Top 50 Startups in SEA by Tech In Asia and received investments from ARA Asset Management and JL Investment Group, enabling the company to launch new investment products in the real-estate space.
54.	LIEW Yee Kay	Co-founder, Tech For She	Kay is the co-founder of Tech For She, a community that aims to create an inclusive learning-as-a-service environment for women from non-tech and diverse backgrounds. At the same time, she works as a digital consultant with Accenture Interactive, on a

			spectrum of projects that focus on digital strategy, product management and customer experience.
55.	LIM Irene	Executive Director and Technology Center Manager, J.P. Morgan Singapore (JPM)	As an advocate for women in STEM, Irene pioneered several programmes to promote a diverse technology workforce in JPM. One example is the 'Winning Women in Technology' initiative, which encourages STEM undergraduates to pursue a career in technology at JPM. Within four years, it resulted in a 150% increase in local female graduate hires for the Software Engineer Programme.
56.	LIU Fei	Chief Security Researcher, Huawei	Liu Fei, a leading security researcher in 6G networks, is one of the authors of the first 6G security whitepaper published by IEEE in 2020. She is also the lead author of the chapter "6G Native Trustworthiness" in *6G: The Next Horizon, From Connected People and Things to Connected Intelligence*, published by Cambridge University Press in 2021. Currently, Liu Fei is working on designing 6G trustworthiness architecture that will integrate technologies including cryptography and AI.
57.	LIU Jinyue	GIS Fellow, Genome Institute of Singapore, A*STAR	Jinyue is a pioneer in applying spatial transcriptomics on biological tissues, and has presented her ground-breaking work at conferences including the International 2021 Advances in Genome Biology and Technology conference. Her vision is to develop new ways to decode mental illness and other mysteries of the human body.
58.	LOKE Hui Yi	Senior Cybersecurity Specialist, GovTech	Hui Yi is a cybersecurity practitioner in the field of vulnerability research. As part of her work at GovTech, she helps the Singapore government evaluate commercial products such as internet surfing gateways and malware detection appliances. She has also been credited in the international Common

			Vulnerabilities and Exposures (CVE) program for reporting vulnerabilities in Razer Chroma SDK Server and Artifex MuPDF.
59.	MAHMOOD Syarah	Lead Artist, Ubisoft	A gaming-art enthusiast since her polytechnic days, Syarah's dream was realised in 2015 when she joined Ubisoft Singapore. Currently, Syarah is the Lead Artist for the second expansion to Assassin's Creed Valhalla – The Siege of Paris – a project led by Ubisoft Singapore. Her work has seen her collaborating with gaming veterans across the world. She is passionate about creating and building immersive game worlds with a talented and diverse team.
60.	MALHOTRA, Neha	Vice President, Global Attack Surface Management Program Manager, Credit Suisse	Neha is an established cybersecurity professional, and has led multiple global, strategic security and digital transformation initiatives across large MNCs. As an active cybersecurity champion, Neha conducts security awareness sessions, including those for young students and senior citizens of Singapore. She also volunteers to conduct career awareness and mentorship sessions for students and women in STEM.
61.	MERCZ Alexandra	Information Security Chief of Staff, Gojek	Alexandra dedicates her free time to fostering and mentoring young female talent in technology and cybersecurity. This year, she launched her own mentorship programme with (ISC)2 Singapore Chapter to advise young professionals on their career development, upskilling, and reskilling. About 45% of mentors and mentees are women. Alexandra is also a Committee member and Chapter Ambassador for the (ISC)2 SG Chapter. Other voluntary organisations she is involved in include Techladies, CodingGirls, Lean In SG, SheSays SG and Junior Achievement SG.
62.	MISHRA Seema	Co-founder, Pinkstripes	Seema launched Pinkstripes in 2018 as a go-to platform for women seeking career acceleration. Pinkstripes aims to give

			women the mentoring and upskilling they need to pursue technology careers. To date, it supports about 200 women from technology, consulting and fintech areas to advance their careers.
63.	NAI Sharon	Acting Research Division Director, Manufacturing Process, Singapore Institute of Manufacturing Technology (SIMTech, A*STAR)	Dr Sharon Nai played an instrumental role in setting up the 3D Additive Manufacturing (AM) process research in SIMTech. She provides research leadership and plans for high impact research outcomes through active technology foresight and networking with different stakeholders. Under her leadership, her team has made significant progress in establishing an integrated end-to-end 3D additive manufacturing solution for metal, ceramic and polymer components, covering design powder synthesis, AM processing and post-process finishing.
64.	NG Daphne	CEO and Co-founder, Dedoco	Daphne is the co-founder of Dedoco, a first-of-its-kind digital document and signing solution that seeks to transform the way enterprises manage digital workflows while issuing trusted, verifiable documents and credentials that will boost digital transformation in companies. Daphne successfully raised S$3.3 million in a seed round led by Vertex Ventures Southeast Asia in 2021 for its regional scale and expansion plans.
65.	NG Wee Wei	Country Managing Director, Accenture Singapore	An advocate for continuous training, Wee Wei believes that it is the key to creating a future-ready workforce. In addition to developing the talent pool within Accenture, Wee Wei supports the growth of local talents through national reskilling programmes in collaboration with the government and other organisations. She is currently working on a platform to reimagine the future of cities as the pandemic and digital transformation has changed mindsets and behaviours.

66.	NGUYEN Yen Ngoc, Mabel	Co-founder and CEO, Elocare	With a doctorate in biomedical engineering, Mabel focuses on providing solutions to support the ageing and chronic care sector. Together with her co-founder, she led the development of a menopause tracker to assist women and their healthcare providers in managing menopausal health more effectively. Her team has collaborated with the National Healthcare Group and St Luke's ElderCare to develop new healthcare products for the elderly under the funding support of up to S$2 million from Enterprise Singapore.
67.	ONG Chen Hui	Cluster Director, Biztech Group, IMDA; Chairman, SG Women in Tech, IMDA	A technology practitioner turned tech strategist, Dr Ong has 20 years of experience in R&D and technology innovation. She crafts Singapore's investments in key Smart Nation and Digital Economy strategies, creating conditions for Singapore industries to thrive in emerging technologies and equipping people with the necessary skills to leverage these frontier fields. Dr Ong also leads the SG Women in Tech initiative and is a mentor in the Ladies in Cyber initiative of the Association of Information Security Professionals.
68.	ONG Hwee Yee	Writing Systems Master, HP	With over two decades of experience, Hwee Yee leads the R&D of new print writing systems. Her domain expertise and leadership excellence recently earned her the rare recognition as the first and only female Technical Master-level Engineer at HP Singapore. In this role, she can impact and influence future roadmap planning, architecture and R&D development. Hwee Yee's work has led to improvements in black ink print speed and in warranty life.
69.	ONG Lorraine	Assistant Director, GovTech	Lorraine has 20 years of team leadership and ICT industry experience in industries ranging from the private sector and government agencies to multinational companies. She has received various awards for enabling innovations through the

			projects, products and programmes she has implemented. In 2020, she was shortlisted and emerged as the winner of the "Transformation Leader of the Year Award" in the prestigious Women in IT Awards Asia.
70.	OOI Sim Leng, Maybelline	Co-founder and CEO, VIRTUAI	Maybelline is the co-founder of VIRTUAI, an integrated platform that incorporates virtual simulation with AI and analytics to enable the global community of healthcare learners and trainers to share knowledge in a secured environment. This programme is currently used to train nursing and medical students in Singapore as part of the curriculum for interprofessional training among healthcare professionals.
71.	OW Serene	Director, Design, Digital Realty	An expert in designing data centres, Serene is committed to building more energy-efficient and greener data centres. Working within a team of 12, she reviews new technologies and works closely with research partners and vendors to develop and implement new sustainability solutions.
72.	PURSWANI RAMCHANDANI Nuri	Senior Manager, Data Science, Visa	Nuri works on data-driven approaches for mapping sustainable consumption. She has demonstrated exceptional thought leadership in explainable AI, and has published a number of whitepapers. In her spare time, she contributes to data for good initiatives, and has also contributed thought leadership on forums relating to AI Fairness such as the ATxAI conference earlier this year.
73.	RAJENDRAM Naomi	Head of Salesforce Marketing Technologies, Accenture Southeast Asia	Naomi is both Accenture's Salesforces marketing technology expert and regional lead for People With Disabilities (PWD). She has lost 70% of her hearing and will be completely deaf one day. She leads digital transformation programmes for large MNCs, and has successfully spearheaded strategies across aviation and financial services industries that have resulted in double-digit

			growth for her clients. She brings her love for technology to educate and raise awareness for the deaf and Hard of Hearing (HoH) community.
74.	RASTOGI Vaishali	Managing Director and Senior Partner, Boston Consulting Group (BCG)	Vaishali leads BCG's global Technology, Media & Telecommunications (TMT) practice, one of the biggest and fastest-growing areas for the consulting company. This is also the first time that a female executive has held this leadership role and the first time this is held in Asia. Previously, she headed BCG's entire business in Southeast Asia, co-led BCG's sales topic globally and was the Asia Pacific leader for the firm's Marketing, Sales & Pricing practice. She has also been a member of BCG's global Executive Committee.
75.	ROUAM Sigrid	Head of Data Platform, Credit Suisse	Sigrid is a data and digital transformation leader who is involved in setting guidelines for the creation of responsible AI. A strong advocate of women in tech, she volunteers her time in mentoring programmes for women and non-profit agencies. Sigrid has 5 mentees under her wing, and aspires to contribute to their development and serve as an inspiration for future female data leaders in a male-dominated industry.
76.	ROY Sharmili	Data Science Senior Lead, Tokopedia	Sharmili specialises in collaborative intelligence that brings together the forces of human intelligence and machine precision. She leads a team of data specialists to focus on developing technology to accelerate the adoption of e-commerce in the remote districts and islands of Indonesia. An industry mentor of Bangkit, a joint venture between Google and industry partners to develop data science talent in Southeast Asia, she mentors potential startups in various sectors, as well as young women and entrepreneurs.

77.	SAVAGE Hazel	Co-founder, Musiio	Hazel is the founder and CEO of Musiio, an AI company in the music industry. She has raised around S$3 million seed investment during COVID-19 to fund Musiio's expansion and operations. Her efforts have led to exponential growth in annual revenue, including signing on notable clients such as Epidemic Sound, Beatstars and Hipgnosis Songs Fund. Hazel is a heavily sought speaker at conferences, podcasts and panels due to her ability to distil complex AI concepts into simple digestible insights.
78.	SAW Michelle	Vice-President, DT Select APJ Sales, Dell Technologies	A tech industry leader and an advocate of diversity and inclusion, Michelle is instrumental in driving a key programme to support women in tech in Singapore. Launched in 2020, the MentorConnect programme is a collaboration between IMDA, Dell Technologies, Salesforce and ST Engineering, and provides mentoring, leadership and networking opportunities for women talent. The programme benefitted 48 mentees across four companies in 2020. Michelle is also the executive sponsor of the Singapore chapter of Dell Technologies' Women In Action.
79.	SILVEIRA Beatriz	Head of Cyber Security Fusion Center APAC, Citi	Beatriz is the first female cybercrime intelligence officer for Interpol's Global Complex for Innovation, where she has provided threat intelligence for regional and global cyber operations. She is certified in various technologies and cyberthreat protocols and has published books and papers on cyber-related themes. Beatriz is also a diversity and inclusion advocate, having joined multiple initiatives to support and empower women in cyber and work returnees.
80.	TAN Alina	Associate Principal, Enterprise Security Architect, Dyson	Alina is a leading figure in the automotive cybersecurity industry in Singapore. She founded and leads the Car Security Quarter (CSQ) and the Singapore Chapter of the Automotive Security Research Group (ASRG-SIN). She led a team to build the Connected and Autonomous Vehicles Lab from scratch to

			perform vehicle research and testing on resiliency. Through her work, she has established Singapore as a key vehicular security knowledge hub in the global cybersecurity ecosystem.
81.	TAN Dawn	Associate Professor, Engineering Product Development, Singapore University of Technology and Design	Dawn is a Fellow of the Optical Society for her "Pioneering and significant contributions to CMOS-compatible nonlinear optics and integrated photonics". She was named an MIT Technology Review Innovator Under 35 (Asia) and awarded the L'Oreal for Women in Science National Fellowship. She was on the founding committee of the Singapore Computer Society Women in Technology Special Interest Group and continues to contribute towards promoting gender parity in engineering.
82.	TAN Jean	Software Engineer, GovTech	An experienced software engineer, Jean is behind many systems that allowed the government to keep residents informed during the COVID-19 crisis. Prior to the pandemic, she led the development and launch of Postman, a mass-messaging service that transformed the way the government communicates and connects with citizens. Since its launch, Postman has delivered over six million email messages and 1.5 million text messages across 15,000 messaging campaigns.
83.	TAN Jenny	Vice President, ISACA	Jenny pioneered the SheLeadsTech Programme for the ISACA Singapore chapter, a programme to elevate and engage female technology leaders. She advocates "softer" technology topics that most tech professionals overlook such as emerging trends in AI ethics and psychological cybercrime. Jenny is also active in supporting other associations and industry events as a frequent speaker on technology governance, risk and compliance subjects. At work, she leads the internal audit practice at CapitaLand.

84.	TAN Josephine	Director, Solution Services - Digital Platform, Global Technology, McDonald's	In her current role, Josephine is focused on leveraging technology to enable business growth with global loyalty, mobile ordering and delivery programmes in over 60 markets worldwide. She is the co-lead of the Singapore chapter for the McDonald's Global Women in Technology, and also volunteers her personal time with Girls2Pioneers, an initiative by the United Women organisation that provides day camps for girls to cultivate interest and skills in STEM.
85.	TAN Lee Chew	President Commercial, ST Engineering	Lee Chew is a high achieving, international technology and business leader who is paving the way for women in tech in Singapore, and across Asia. She leads the Women in Tech Chapter at the Singapore Computer Society where she believes the Chapter is a catalyst to build confidence and nurture tech interests in women of all ages and backgrounds. She also spearheaded initiatives such as the inaugural AWS DeepRacer Women's League in 2020 in ASEAN to help women develop machine learning skills.
86.	TAN Shui-Min	CIO, NUS IT Office, National University of Singapore	Shui-Min was appointed as NUS Chief IT Officer in November 2020, but in her short tenure, has spearheaded many ground-breaking projects that exemplified her leadership. Most recently, she has been challenged with keeping 60,000 NUS students and staff free from the COVID-19 pandemic by leveraging IT solutions. She had the foresight to re-architect legacy systems to provide an integrated pandemic suite of applications in 2019.
87.	TAN Si-Hui	Chief Science Officer, Horizon Quantum Computing	Si-Hui is an exceptionally talented scientist, and has published extensively on optical quantum information processing and secure quantum computing. Her vision is to ensure that quantum computing is accessible to more industries. With her team, she has compiled a large conventional software semi-automatically into a quantum circuit consisting of over 10 trillion quantum gates.

			She is excited to be part of what would be one of the largest quantum programmes to be compiled for a real-world application.
88.	TEO Peiru	CEO, KeyReply	Peiru, who transitioned from a non-tech background to the deep tech industry, is known to be a gritty and ultra-sharp problem solver. She has been working towards making healthcare services, knowledge and data accessible to patients without adding load on healthcare workers. She runs KeyReply, whose healthcare conversation AI and knowledge management platform is accredited by IHiS, the technology agency for the Singapore public healthcare sector.
89.	THAM Loke Kheng	CEO, Mediacorp	As CEO of Mediacorp since 2017, Loke Kheng has been instrumental in driving the organisation's evolution from a free-to-air broadcaster to a multi-platform, digital-first national media network. In tackling myriad business challenges brought about by disruption, she led the charge to embrace technology across the organisation and pivot to a customer-centric approach of delivering news and entertainment content.
90.	THING Vrizlynn	Head, Cyber Security Strategic Technology Centre, ST Engineering	Upping Singapore's efforts and capabilities in cybersecurity is Vrizlynn's main objective. She is a member of the International Advisory Board Member of Yaksha, an EU-ASEAN Partnership in Cyber Security, to develop innovative methods for malware detection, collection and analysis and designing a specialised system for the analysis and storage of such information.
91.	VETRIVILLALAN Vennila	Assistant Director, Data Analytics, Singapore Management University	With 30 years of progressive experience in the analytics and technology space, Vennila is the programme chair / AI and Analytics track chair for the Asia Higher Education User Group and captain for the Higher Education Analytic Meetup group in Singapore. She regularly shares her domain expertise on the

			Advance Analytics framework and Data Analytics solutions for utilisation in various institutions.
92.	WANG Cherie	Founder, Planner Bee	Central to Cherie's mission is the desire to make financial literacy accessible to everybody via the mobile phone. With 10 years of experience at the top 5 percent of financial advisors globally, Cherie has created a mobile app that enables customers to see all their financial instruments in one place, empowering them to make more informed financial decisions.
93.	WANG Rong	President's Chair Professor, Nanyang Technological University	With over 30 years of experience in chemical and environmental engineering, water and energy research and innovation, Rong's inventions have led to 30 patents and technical disclosures for novel membrane fabrication. She is the Editor-in-Chief of Journal of Membrane Science, a flagship journal in the global membrane community, and has led the Singapore Membrane Technology Centre (SMTC) at NEWRI, NTU for 10 years.
94.	WONG Geraldine	Chief Data Officer, Grab-Singtel Digital Bank	Geraldine's vision is to use data and AI to better manage risk and forge a more inclusive and sustainable financial ecosystem. As a data analytics expert, she is involved in driving Grab-Singtel Digital Bank's data strategy and promoting data-driven financial inclusion. She is also involved in mentoring programmes with various organisations to encourage girls to adopt data and tech fields.
95.	WONG Gin	Head, Technology Architecture and Policy, Singapore Pools	Gin drives the architectural and policy direction across multiple development and technology teams at Singapore Pools to ensure ongoing alignment of IT and business strategies. Under her stewardship, her pillar introduced continuous development, deployment and test automation capabilities through DevSecOps

			and Test Automation platforms, bringing best-in-class quality assurance standards for IT deployments.
96.	WONG Sylvia	Director, Digital & Integration Services, IHiS (Integrated Health Information Systems)	Sylvia's work ensured that COVID-19 IT enablement for swab operations and vaccination operations at various settings across the island worked smoothly. Leading a team, she rolled out an online portal to facilitate swab operations in multiple rapid iterations. She has found the work immensely gratifying for it has helped Singapore better manage the COVID-19 crisis.
97.	YANG Le	Group Leader, Institute of Materials Research and Engineering, A*STAR	As a relatively young scientist, Le already has several publications in top-tiered international journals and holds several patents in high-performance printable electronics. Leading a team of eight researchers, her PROFESS Group (**PR**inted **O**rganic **F**lexible **E**lectronics & **S**en**S**ors) is studying functional materials properties and device (photo)physics to build flexible and printed devices for various applications in medicine, agriculture and energy industries.
98.	YEONG Wai Yee	Associate Chair (Students) at School of Mechanical and Aerospace Engineering, Nanyang Technological University	An expert in 3D printing research, Wai Yee's research and innovative leadership are well-recognised internationally. She has accumulated over 20 intellectual properties that include new processes, 3D printable metal alloy and hydrogel. Her early research in tissue engineering has also produced possibilities like creating new substitutes for organs or tissues.
99.	YOUNG Yoke Mun, Janet	Managing Director and Head, Group Channels & Digitalisation, UOB	Janet spearheads UOB's distribution channels, customer experience and advocacy, and financial technology (FinTech) and ecosystem partnership strategies to make banking simpler, safer and smarter for customers. Her commitment to building Singapore's FinTech community includes supporting the formation of the Singapore Fintech Association (SFA) and The

			Finlab, a FinTech and innovation accelerator to champion innovation and promote FinTechs.
100.	ZHAO Jingyuan	Vice President of Insights and Data, APAC, Capgemini	A thought leader in AI, Jingyuan set up the Asia-Pacific AI Centre of Excellence for Capgemini. Her aim is to collaborate with companies to build their AI capabilities and drive their business outcomes. She is also passionate about nurturing young tech talents through her involvement in various AI and data initiatives such as HyperHack Singapore 2019 and 'Teens in AI 2021'.
