

Annex B – Industry Partners’ Initiatives to Build VP Capabilities

1. AUX Media

Launch of Singapore x Korea VP Training Programme

To supercharge the storytelling capabilities of local media professionals through VP. Participants will be trained by experienced VP professionals from South Korea’s XON Studios (XON), to execute In-camera Visual Effects (ICVFX) projects through a series of workshops held in Korea and Singapore. Mentorship will also be provided by the trainers, to guide participants to produce a short film as the course’s final project work.

Key Highlights

- Skills to be imparted:
 - Executing ICVFX productions
 - Stage prep for ICVFX
 - IP Development for VP
- At the end of the course, participants can expect to be able to:
 - Incorporate VP when conceptualising their story ideas
 - Know when to use ICVFX for their productions
 - Select and integrate Digital Assets with physical sets for ICVFX productions
 - Communication with different production departments when executing ICVFX projects

Sign up details:

- Call-for-participation (11 - 22 Dec): Applicants can apply for the programme through the sign-up link on Aux Media’s social media pages and website. 10 participants will be selected and two projects amongst the 10 submitted will be selected as the final projects for the training.
