

Worried about international scam calls and SMSes? Activate the international call and SMS blocking features

These features are available **free of charge** from your telcos (Singtel, M1, StarHub and SIMBA)

1 Activating these features will **block all incoming calls and SMSes** from international numbers.

- This is useful for those who do not expect calls or SMSes from international numbers.

*Calls and SMSes made from Singapore numbers (e.g. Singapore users roaming overseas and calling or texting home) will still be received as normal.

2 You can **disable the features while travelling** and reactivate them when you return to Singapore

- Check in with your telcos for the time required to effect the changes.

Reach out to your telcos (Singtel, M1, StarHub, SIMBA) to activate the features and safeguard yourself against scams.
