

Dear IMDA,

We are a family of four adults and three children. We live in Bukit Timah.

I am very afraid of Singapore accepting to bring 5g to Singapore.

I take many steps in my home to avoid wifi, 4g and electrical radiation, in order to protect my family.

I'm aware that it had been rejected by many countries already, in order to protect the people from the quietly damaging radiation that will be emitted.

The American army had used 5g in order to get their opponents to lose morale, and successfully so.

PLEASE DO NOT BRING 5G SINGAPORE.

Dr Mona Board
