

Dear sir/madam,

I would like to urge our government to please refrain from implementing 5G mobile services and networks in our country. Indeed really consider the harmful and damaging effects of such 5G implementation will have on people and the natural and living environment. Is it really so important to have faster networks and smart technologies at the cost of damaging our health, our children's health and our environment?

Is it really so difficult to delay this until further tests have been done and fool-proof precautionary measures taken to ensure people's health and well-being, than risking people's lives and health, risking damaging our environment? Just for the sake of convenience and productivity, to enhance speed in doing things, we are letting humans and environment be guinea pigs of such damaging effects that we do not even know the magnitude yet! Please don't.

Especially our innocent younger ones, why should they be subject to all this at such a young and tender age, they should be given the right to live, the right to live in an environment that is free from such wireless radiation, such senseless and damaging effects on their health and well-being which is uncalled for. I urge our government to read these links:

<https://www.globalresearch.ca/sign-the-international-appeal-to-stop-5g-on-earth-and-in-space/5680202>

<https://www.jrseco.com/european-union-5g-appeal-scientists-warn-of-potential-serious-health-effects-of-5g/?fbclid=IwAR3PwUptcArCle5mlccb6eN4axtNFQwqnTnmjrlajATZDxt4pPrEhkl12Ao>

As well as all the research and studies on 5G and wireless radiation, to get a better picture of what we as parents, as people living here, are concerned about.

I am glad IMDA is having a public consultation on this and I sincerely urge government to look into such health and environmental concerns seriously and have a heart, and do not implement this 5G please.

Regards,
Joanna
