

Dear IMDA,

I do not want Singapore to start operating 5G networks and mobile services. 5G will substantially increase exposure to radio frequency electromagnetic fields (RF-EMF)... and has been proven to be harmful for humans and the environment.

Potential hazards for human health and the environment should be fully investigated by scientists independent from industry before any country launches it. The risks of 5G are too high. I am extremely concerned about the potential danger of 5G to the youngest generations - young children.

Please do not launch 5G networks and mobile services in Singapore.

Kind regards,

Melanie Kao
