RE: Comments and feedback regarding the 5G Mobile Service and Networks

I would like to share my doubts regarding the deployment of the 5G services and its impact to the health of the people.

I would like to ask and seek understand if there is any substantiate research and studies to be able to come to a conclusion that there is no health risk and dangers of the people when they are being exposed to the radiation that is coming from the base station/cell station of the 5G networks.

Yours Sincerely,

Thoo Hoi Thian
