Telecommunications Standards Advisory Committee (TSAC)

The TSAC advises IDA on the setting of ICT standards as well as on the development and recommendation of specifications, standards, information notes, guidelines and other forms of documentation for adoption and advancement of the standardisation effort of the Singapore ICT industry (hereafter termed "IDA Standards").

Telecommunications standards-setting in Singapore is achieved with the assistance of TSAC, where professional, trade and consumer interest in telecommunications standards is represented on the TSAC with representatives from network and service operators, equipment suppliers and manufacturers, academia and researchers, professional bodies and other government agencies.

List of TSAC Members

TSAC Chairman:

Mr Raymond Lee	Director (Resource Management & Standards), Infocomm Development Authority of Singapore
----------------	-----------------------------------------------------------------------------------------

TSAC Members:

Mr Lim Yuk Min (TSAC Vice-Chairman)	Deputy Director (Resource Management and Standards), Infocomm Development Authority of Singapore
----------------------------------------	--------------------------------------------------------------------------------------------------

Mr xxx	Designation, Organisation
--------	---------------------------

Mr xxx	Designation, Organisation

NOTICE

THE INFOCOMM DEVELOPMENT AUTHORITY OF SINGAPORE (“IDA”) MAKES NO WARRANTY OF ANY KIND WITH REGARD TO THE MATERIAL PROVIDED HEREIN AND EXCLUDES ANY EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OF NON-INFRINGEMENT, MERCHANTABILITY, SATISFACTORY QUALITY AND FITNESS FOR A PARTICULAR PURPOSE. SUBJECT TO THE MAXIMUM EXTENT PERMITTED UNDER LAW, IDA SHALL NOT BE LIABLE FOR ANY ERRORS AND/OR OMISSIONS CONTAINED HEREIN OR FOR ANY LOSSES OR DAMAGES (INCLUDING ANY LOSS OF PROFITS, BUSINESS, GOODWILL OR REPUTATION, AND/OR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES) IN CONNECTION WITH THE USE OF THIS MATERIAL.

IDA DRAWS ATTENTION TO THE POSSIBILITY THAT THE PRACTICE OR IMPLEMENTATION OF THIS STANDARD MAY INVOLVE THE USE OF INTELLECTUAL PROPERTY RIGHTS AND TAKES NO POSITION CONCERNING THE EXISTENCE, VALIDITY AND/OR APPLICABILITY OF ANY SUCH INTELLECTUAL PROPERTY RIGHTS, WHETHER ASSERTED BY TSAC MEMBERS OR ANY THIRD PARTY.

AS OF THE DATE OF APPROVAL OF THIS STANDARD, IDA [HAS/HAS NOT] RECEIVED WRITTEN NOTICE OF ANY PATENT RIGHTS WHICH MAY BE RELEVANT IN RELATION TO THE IMPLEMENTATION OF THIS STANDARD. HOWEVER, IMPLEMENTERS ARE CAUTIONED THAT THIS MAY NOT REPRESENT THE LATEST INFORMATION AND ARE THEREFORE STRONGLY URGED TO CHECK WITH THE RELEVANT DATABASE IN ITU, ISO, IEC OR THE RELATED STANDARDS DEVELOPMENT ORGANISATION FOR INFORMATION OF PATENT RIGHTS. IMPLEMENTERS ARE ADVISED TO OBTAIN THEIR OWN LEGAL AND/OR TECHNICAL ADVICE IN RELATION TO THE IMPLEMENTATION OF THE STANDARD IF REQUIRED.

1 General Requirements

1.1 Scope of Specification

- 1.1.1 This Specification defines the minimum technical requirements for wireless broadband access (WBA) equipment operating in the 2.3 and 2.5 GHz licensed frequency bands where line-of-sight is not essential. The term WBA equipment refers to the base stations or subscriber stations which provide the broadband wireless connectivity, as well as the fixed or mobile devices which require the connectivity.
- 1.1.2 The Specification does not restrict the type of WBA technology to be employed. It mainly defines the operating frequency bands, emission and output power limits, and electromagnetic compatibility and electrical safety requirements where relevant. Applications may include: point to multipoint backhaul (e.g. E1/T1 services for business), point to point backhaul (e.g. connecting to Internet backbone), and consumer last mile and portable wireless broadband Internet connection.
- 1.1.3 The Specification includes, as examples, references to the interoperable standards that have been created by the WiMAX Forum, based on the IEEE 802.16, IEEE 802.16m, the ETSI HIPERMAN standards, IMT-2000 OFDMA TDD WMAN and IMT-Advanced WirelessMAN-Advanced.
- 1.1.4 The Specification does not define a standard for WBA network compatibility and equipment interoperability. As such, suppliers of WBA fixed or mobile devices are required to ascertain to which WBA network equipment and operator their WBA devices are intended for interoperating.

1.2 Design of Wireless Broadband Access Equipment

WBA equipment shall be designed to meet the following basic objectives:

- (a) The Radio Frequency (RF) carrier of the WBA equipment shall be tuned to operate within the frequency spectrum assigned to its WBA operator.
- (b) The WBA equipment shall not be constructed with any external or readily accessible control which permits the adjustment of its operation in a manner that is inconsistent with this Specification.
- (c) The WBA equipment (e.g. base stations) may be ac powered or dc powered. For ac powered equipment, this Specification shall be complied with when operating from an AC mains supply of voltage $230V \pm 10\%$ and frequency $50 \text{ Hz} \pm 2\%$. Where external power supply is used, e.g. ac adaptor, it shall not affect the capability of the equipment to meet this Specification.
- (d) The WBA equipment shall be marked with the supplier/manufacture's name or identification mark, and the supplier/manufacture's model or type reference. The markings shall be legible, indelible and readily visible.

2 Technical Requirements

The WBA equipment shall comply with the maximum output power and emissions limits, operating in its intended frequency bands. It shall fulfil the requirements of this Specification on all the permitted frequencies which it is intended to operate.

2.1 Frequency Assignments

The WBA equipment shall be tuned or programmed to operate within the frequency spectrum assigned to its WBA operator, located in the 2300 to 2350 MHz and/or 2516 to 2678 MHz frequency bands.

2.2 Power and Emission Limits

2.2.1 Transmitter output power of base stations shall be limited to 100W EIRP while mobile stations shall be limited to 2 W EIRP.

2.2.2 The spurious emissions shall not exceed – 57 dBm in the frequency range 30 MHz to 1 GHz (measurement bandwidth: 100 kHz) and – 50 dBm in the frequency range 1 GHz to 26.5 GHz (measurement bandwidth: 1 MHz).

2.2.3 The base stations shall be set to work in a manner which is safe and does not impair or interfere with the working of any other station or network authorised by IDA.

2.3 Electromagnetic Compatibility and Electrical Safety Requirements

If the WBA equipment is a base station or a subscriber station, it shall comply with the EMC emissions from the DC power or AC mains power input/output ports defined in the ETSI EN 301 489-1 or IEC CISPR 22. It shall also comply with the safety requirements defined in IEC 60950-1 safety standard.

2.4 System Profiles

In implementing HIPERMAN compliant systems, the WBA equipment may use a common HIPERMAN system profile to achieve multi-vendor equipment interoperability.

3. Compliance with Technical Requirements

3.1 Suppliers shall demonstrate that the WBA equipment has been tested¹ to comply with the power and emission limits, and the permitted range of operating frequencies stipulated in § 2.1 and § 2.2 of this Specification. Measurement methods of the testing shall be as defined in FCC Part 27 or ETSI EN 300 440-1, or equivalent methods as specified by the manufacturer.

3.2 If the WBA equipment is a base station or a subscriber station, which is directly or indirectly powered by the AC mains, suppliers shall also demonstrate that it has been tested according to measurement methods and limits for:

- (a) EMC emissions from the DC power or AC mains power input/output ports defined in ETSI EN 301 489-1 or IEC CISPR 22; and
- (b) Electrical safety defined in the IEC 60950-1.

¹ IDA accepts test reports from (a) labs recognised by IDA under Mutual Recognition Arrangement (MRA); (b) labs accredited by accreditation bodies recognised by IDA; or (c) equipment manufacturers. The list of testing labs recognised by IDA under MRA is available from IDA's website www.ida.gov.sg, under Policy & Regulation / Telecommunication Equipment Standards & Approval.
