Consultation on Proposed Allocation of 6 GHz Band

Dear Sir/Madam,

With regards to the propose allocation of 6 Ghz, beside just trying to match up with EN 303 687, I would like to propose to extend the possibility to include **some limited** use Standard Powered Access Point (36 dBm) as well as **Automated Frequency Coordination** just like FCC to be used in various Institute of High Learning (IHL), so that it is possible for them conduct research in some of this new areas.

As most IHL has a large campus, the Standard Powered Access Point could be limited to be used in the central portion of the campus, and hence reduce the possibilities of interference with the surrounding.

Warm regards,

Dr Yap Chern Nam
