

ANNEX B
Media profiles for SG Digital Leaders

SG Digital Leaders 2026	
<p>Name: Shanice Choo Designation, Company: APAC Innovation Lead, Clifford Chance Languages spoken: English</p>	<p>In her role as APAC Innovation Lead, Shanice shapes how Clifford Chance designs, deploys and governs the use of artificial intelligence across its legal services and operations in the Asia Pacific region. Her work focuses on embedding a human-led, AI-powered approach that enhances the quality, efficiency and integrity of client work. Operating at the intersection of legal expertise, technology and risk, she supports how legal services are delivered responsibly and effectively through technology.</p> <p>Based in Singapore, Shanice works closely with the firm’s lawyers and multidisciplinary teams to develop and adopt AI-enabled legal solutions, including regulatory intelligence tools that support proactive risk management and informed decision-making.</p> <p>Her work draws on her experience gained working at the intersection of platform governance and regulatory compliance, which helps to address digital policy challenges, including misinformation and online harms across Asia Pacific.</p> <p>Shanice is also a committed advocate for gender equity in tech, serving on the steering committee for the firm's Accelerate gender parity group and mentoring young women entering STEM careers through Inspiring Girls Singapore. She is recognised as an SG100 Women in Tech (2025) and one of LexisNexis' Seven Women to Watch in Legal Tech (2024).</p>
<p>Name: Lum Chune Yang Designation, Company: Co-Founder & Chief Executive Officer, SpeQtral Language spoken: English</p>	<p>Chune Yang is the Co-Founder & CEO of SpeQtral, a pioneer in quantum-secure communications. With over 18 years of experience spanning quantum physics, satellite communications, and technology commercialisation, he leads SpeQtral's mission to enable global quantum-secure networks that addresses the growing cryptography threats posed by quantum computing.</p> <p>As CEO, Chune Yang has played an instrumental role in shaping and driving key initiatives within SpeQtral - these include the development and launch of the SpeQtre quantum satellite, and SpeQtral's leading role in Singapore's NQSN+ and the European Space Agency's International Use Cases for Quantum Key Distribution (INT-UQKD) programme. He works closely with governments, defence groups, space agencies, and critical infrastructure providers to deploy quantum-secure communications at scale.</p> <p>Prior to co-founding SpeQtral in 2018, Chune Yang held senior roles at global satellite operator SES and led quantum technology</p>

	commercialisation at the Centre for Quantum Technologies (CQT) at National University of Singapore (NUS).
<p>Name: Dr Alvin Chan</p> <p>Designation, Company: Chief Executive Officer, Neeuro</p> <p>Language spoken: English</p>	<p>Alvin is a serial technopreneur and AI innovator with over 25 years of experience spanning national security, entrepreneurship, data analytics and digital therapeutics. He currently leads Neeuro as Co-Founder and CEO — a global neurotechnology company specialising in brain-computer interface technology, with an AI-driven platform ecosystem that analyses brain signals to measure mental states.</p> <p>He successfully co-founded and led Brandtology as CTO, which was acquired by iSentia, a media intelligence and data technology company that provides media monitoring and analysis services. He contributed to Singapore's national security by delivering complex information security solutions for the Ministry of Defence and other national agencies.</p> <p>He is also involved in published research together with local institutions in several journals, such as Nature Scientific Reports.</p>
Past SG Digital Leaders	
<p>2023 SG Digital Leader</p> <p>Name: Jan Lim</p> <p>Designation, Company: Head of Global and Regional Technology Partnerships, Visa</p> <p>Languages spoken: English</p>	<p>Jan is a senior tech leader in Southeast Asia whose professional growth has been shaped by the SG Digital Leadership Accelerator. Jan was awarded the SG Digital Leader award in 2023.</p> <p>Through the programme, Jan received mentorship from Zubin Gandevia (founder of Venture Catalyst Investments), gaining practical guidance on business growth, capital discipline, and leadership.</p> <p>With support from the programme, Jan also completed executive education at Wharton's Advanced Management Programme and the Singapore Business Leaders Programme organised by the Human Capital Leadership Institute, offering exposure to top faculty and contemporary thinking on leadership and strategy. Jan also built a strong peer network of senior cross-industry leaders that continues well beyond the formal learning.</p> <p>Together, these experiences have sharpened Jan's strategic thinking, global outlook, and ability to lead across markets.</p>
<p>2022 SG Digital Leader</p> <p>Name: Yap E Fang</p> <p>Designation, Company: Senior Partner and Chief Architect, Cloud Data & Architecture, NCS</p> <p>Language spoken: English</p>	<p>E Fang, was among the first cohort of SG Digital Leaders, recognised for her leadership in shaping cloud and digital architecture across the Asia Pacific.</p> <p>She has since been promoted from Partner and Practice Lead to Senior Partner and Chief Architect at NCS, a C-suite role in which she drives architecture standards, knowledge sharing, and enterprise processes across NCS. In this role, she helps organisations harness AI-native capabilities and translate AI into strategic outcomes.</p>

	<p>Supported under the SGDL programme, E Fang completed two courses at MIT Sloan School of Management and Stanford Business School, gaining strategic problem-solving frameworks and AI leadership perspectives that have contributed to her growth as a senior tech leader.</p>
