### **About Clearhub**

Clearhub's ringEmail mobile push mail service ([www.ringEmail.com](http://www.ringEmail.com)) offers mobile thin-client and supports most mobile phones – The Power of Any Email on Any Phone. ringEmail offers the simplicity of a Software-as-a-Service (SaaS) on a hosted or appliance model (ideal service to any Enterprise or Government - direct push mail service within its corporate firewall).

Advantages of ringEmail service such as security, back-end integration, manageability, ease-of-use, power management and push technology will provide a uniquely strong foundation for Enterprise users with an integrated mobile mail solution and also enables access of third party push services or workflow. Clearhub has full backend service provisioning; customer care and billing platform. ringEmail has won an R&D award representing Singapore at the APICTA '07 and was also a merit award winner at the APICTA '07. Key references include Movistar South America and MSN Hotmail.

Other services include 12wap WAP Portal ([www.12wap.net](http://www.12wap.net)) and mClassified mobile classified ([www.mClassified.com](http://www.mClassified.com)).

### **About Infologic**

Infologic FIDS is an advanced, versatile and yet highly robust Flight Information Display System. It manages the flow of relevant data including flights, Baggage carousels & chutes, check-in counters, boarding gates and other airport operations related data and displays them to passengers, airport operators, airport visitors and targeted consumers through a variety of display devices inside and outside the airport.

Infologic FIDS is being used in many major airports, the latest successful implementation being the T3 of Beijing Capital International Airport a.k.a. the 2008 Olympics Airport. It is the single largest building on earth, with annual passenger capacity of 31 million and total floor area of about 900'000 m2. Infologic FIDS at Beijing T3 comprised 1500 units of display devices showing real time 24/7 flight information. The system displays text, graphic and video elements on TFT monitors, PDP monitors, LED and big LCD boards.

### **About SQL VIEW**

SQL View is a leading knowledge repository and electronic records management provider, pioneering Singapore government's electronic registry requirement.

Our flagship product, KRIS is an enterprise-strength solution meeting today's e-record demands catering to functional roles, policies and properties of records. KRIS complies to both local and international standards of practice with its policy based infrastructure. KRIS' recognize the corporate importance of records as an official evidence of business related transactions, decision and information. As such, it is strongly positioned to lay the foundation of an efficient and executable records management system in any enterprise.

While our expertise is in e-Government application, there really is no limit to where our product can be applied, across industries and across functions. The sectors we support apart from e-Government includes Building and Construction, Healthcare, Legal, Oil and Energy, Manufacturing and Hospitality.

### **About Transfer To™**

Transfer To™ is a global mobile airtime network enabling small value transfers through mobile phone. With this solution, migrants can send mobile credit from their mobile phone or through retailers to their relatives back home. It is a fast, reliable and convenient solution for international mobile top-up.

200 million people are working and living in a country other than their home one. Remittance back home is a \$300 billion market. Mobile phone penetration in this population is over 80%. This market has been completely overlooked and underserved by the traditional players.

For more information, please visit the following website: [www.transfer-to.com](http://www.transfer-to.com)
