

# Attackers move fast. We move faster.

The watchTowr Platform.  
Preemptive Exposure Management, built to  
Outpace Attackers.

## In-the-wild exploitation happens in hours - rapid reaction is essential.

watchTowr combines **Proactive Threat Intelligence** with **External Attack Surface Management** into a **Preemptive Exposure Management** solution, to enable organizations to get ahead of in-the-wild exploitation.

These capabilities work together to give organizations a real-time view of their exposure to emerging threats and deliver the answer that matters most: "Are we affected?"

## Validate your exposure to emerging threats within hours.

# Preemptive Exposure Management – Built to Outpace Attackers

## Get Ahead Of In-The-Wild Exploitation

Delivers industry-fastest rapid reaction to emerging threats - accurately validating exposure ahead of in-the-wild exploitation.

## Attacker-Led, Holistic Visibility

Built to mirror how real adversaries operate, watchTower continuously uncovers attacker-facing exposures across every layer from apps and infrastructure to SaaS and cloud.

## Continuous Testing

Continuously validate exposure to real-world threats - 24/7 automated red teaming across your attack surface.

## True Attacker Tactics and Techniques

Identify exposures like a real attacker, not a scanner - covering identity, infrastructure, cloud, SaaS, third-parties, applications, exposed data and more.

## Research-Led

watchTower Labs ensures the watchTower Platform reflects today's attackers - our world-class dedicated vulnerability research and exploit development capability.

## Agentless by Design. Operational in Hours.

 No Agents     No Appliances

### Gain Coverage Within Hours

The watchTower Platform operates fully externally - requiring no agents, appliances or network changes - and delivers full visibility of your attacker-facing exposure in hours.
