

NEW WAYS OF WORK CONFERENCE 2016

SINGAPORE

Event Synopsis

Will traditional modus operandi of the 9 - 5 office structure still be relevant?

Tech is disrupting everything – including the way we work. As we build a Smart Nation, pervasive connectivity throughout Singapore enables everyone and everything to be connected everywhere, anytime. From millennials entering the workforce to employees' need for work life balance, organisations will have an imperative need to relook spaces, technology, and culture to meet an anywhere, anytime lifestyle.

How has technology like social media platforms changed the way employees interact, collaborate and share ideas?

How can organisations make the best out of flexible workspaces as a strategic tool for growth beyond office real estate savings?

How can you attract and retain best of the talents in an increasingly multi-generation workforce landscape?

People, technology and workspace will form new relationships in this new world of work. Come and experience what these trends mean for you and your business.

Join us at the New Ways of Work Conference 2016 Singapore.

Thursday, 20 October 2016 | 8.00 am – 5.30 pm

L4, Roselle Simpor Ballroom, Marina Bay Sands Expo and Convention Centre, Singapore

Co-Working Spaces

Regus

Regus provides flexible workspace solutions that allow companies to concentrate on their core business and maximise their talents. Regardless of size, from global corporate companies or start ups, Regus enables and encourages companies to be more flexible, cost-effective, agile and better suited to face the unexpected challenges of business in the 21st century.

The Working Capitol

A co-working space with a community and lifestyle focus, The Working Capitol is centred around helping its members to scale and grow. TWC's range of workspace solutions and community programmes are designed to help companies attract top talent and build strong corporate cultures.

Trehaus

Trehaus is Singapore's first co-working space complete with child-friendly learning facilities. It is for every parent and every business that embraces the peace of mind that comes with being able to work in a flexible and enriching environment, while keeping their little ones close.

Due to the very nature of its portability and accessibility, the convenience of working on a remote device needs to be weighed up against the increased risk of losing the data contained on it. It also enables hackers to impersonate employee activities and perform destructive transactions. By applying actionable intelligence, Apvera's solutions effectively consolidates and prioritises threats to prevent risk from remotely accessed devices that have direct access to the uncontrolled enterprise applications of companies.

Condeco delivers workplace management solutions that improve the way people work. Through our workplace scheduling and office utilisation software and hardware, companies are maximising the use of their workspaces; from ensuring flexible workspaces run smoothly to providing real-time data on their workspace usage. That's why Fortune 500 companies like Chevron and Barclays are implementing our solutions worldwide. Visit Condeco to learn more about how Smart Office technology is transforming companies globally.

The New Ways of Work is enabled by the surge of collaboration technology and cloud services that have made it possible to be productive, anywhere and anytime. Freedom and flexibility have created a truly mobile, global workforce with the expectation that people are "always on, always connected". Explore Microsoft's full suite of cloud services that will empower individuals and organisations to be more collaborative and productive, embracing the new ways of working.

Double, the world's leading telepresence robot, leverages the sheer simplicity of an iPad for videoconferencing and a self-balancing mobile base that puts the remote worker in control. With video collaboration robots, interactions at work are no longer constrained by the lack of physical presence. Discussions, trainings, and presentations can now happen anywhere. Shipped worldwide covering regions that include North America, Europe and Asia, Double is solely distributed in Singapore by OTSAW Digital.

Philips, a global leader in lighting is taking light beyond illumination with connected lighting innovations to enhance the environment from workplace to home.

Power-over-Ethernet (PoE) connected lighting system for offices gives workers smartphone control of their office lighting, and building managers new insights into building usage, occupancy history and more.

Allowing users to control the lights via an app with preset light recipes, Philips Hue – personal wireless lighting system can also help one concentrate better to boost productivity.

SAMSUNG

Embrace New Ways of Work with Samsung. Knox Workspace makes BYOD easier through better device security control. Samsung Galaxy devices come with Samsung Knox™ protection to keep hackers away, data secure and personal information private. Samsung Gear VR with Speech Centre VR provides an educational platform to help users overcome public speaking phobias and prepare for interviews, negotiations and more. It also allows users to conduct remote learning and training conveniently anywhere, anytime.

SNEF

The Singapore National Employers Federation seeks to advance tripartism and enhance labour market flexibility by enabling employers to implement responsible employment practices. SNEF has a membership of over 3,200 companies with a combined workforce of over 750,000.

SNEF helps employers obtain the government grants needed to implement workplace age management practices, redesign workplaces and processes, build safe and healthy workplaces, and promote flexible work arrangements to benefit both employers and their employees.

Singtel

Technology disrupts everything in today's hyper-connected world. Its pervasive impact on the way we work, our workplaces and even the multi-generational workforce is unstoppable. It is important that businesses relook at workspaces, technology and culture in order to build a digitised world that supports a flexible lifestyle.

Singtel's showcase and track session will demonstrate how ICT solutions can help you to create a collaborative working environment, while scaling up and securing your business.

Tripartite Alliance for Fair & Progressive Employment Practices

The Tripartite Alliance for Fair and Progressive Employment Practices (TAFEP) supports the use of technology as an enabler of work-life strategies. Employers need to be responsive to the needs of an increasingly mobile workforce and work with their employees to identify and implement mutually beneficial solutions. Employers are also encouraged to tap into platforms, such as The New Ways of Work Conference 2016 Singapore, to share their experience and learn from experts and leading organisations.

TWP THE WORKLIFE PROFESSIONALS

The Worklife Professionals specialises in interfacing between clients and technology to introduce greater flexibility in the workplace. Since 2005 we have been helping companies use the Work-life Fund and implement Flexible Work Arrangements. We are pioneers in the use of virtual platforms and flexible workspaces for client training and consultations, and we continue to offer new technologies, such as DNA assessments, that aid in creating bespoke fitness and nutrition programmes for corporate wellness initiatives.

workwander

Workwander provides corporate businesses with a new way of managing work spaces. Appealing to the new working generation and the increase in collaborations and communications; Workwander offers customised solutions to maximise the efficiency and productivity of both the business and its employees in view of the working needs of today.
