

Infocomm_for_Growth@SME: Sectoral programmes to help SMEs grow

Infocomm_Innovation@SME: Innovative programmes to turn SMEs into role-models

Technology Innovation Programme (TIP)

IDA, together with SPRING, will help SMEs grow their businesses through the innovative use of infocomm technologies over the next 3 years under the Technology Innovation Programme (TIP). The programme supports costs (eg. manpower, equipment and professional fees) incurred for the innovations.

Infocomm_for_Growth@SME encourages SMEs in the same industry to make full use of infocomm for business expansion. The aim is to help SMEs improve their businesses and benefit the respective industrial sectors. IDA will urge SMEs to either form groups among themselves or go through their respective chambers or trade associations to work with IDA. Through this joint effort, a few SMEs will have a common system instead of a customised system of their own, which is often more expensive. This way, the common system can incorporate good practices from the industry and SMEs can learn from each other, and even lower the cost of the system at the same time.

Infocomm_Innovation@SME aims at SMEs who are ready to transform their businesses using infocomm and want to set themselves as role models for others.

科技创新计划 (TIP)

在科技创新计划(TIP)下，资讯通信发展管理局(IDA)和标新局(SPRING)将在未来3年，共同协助中小企业以创新方式实施资信科技，帮助业务成长。这项计划将补助中小企业在实施较具挑战性的资信科技项目时所涉及的费用(如人力资源、设备、专业费用等)。

中小企业之资信科技助成长 鼓励相同领域的中小企业充分利用资信科技拓展业务。此项目旨在协助中小企业提高业绩表现，并让相关行业受惠。资讯通信发展管理局鼓励中小企业组织起来，或通过商会或商团与资讯通信发展管理局进一步合作。中小企业可以通过这种合作方式，共享同一个系统，以取代较昂贵的定做系统。这么一来，所有良好的运作方式都可以并入这一套共用系统内。中小企业可以通过这套系统学习彼此的强项，甚至降低系统的操作费用。

中小企业之资信与创新 的实施对象是准备通过应用资信科技，协助业务转型，并希望成为同行典范的企业。
